REVIEW OF THE BRITISH PHARMACOPOEIA 1999 WITH CD ROM

- This classic deserves its reputation but be warned that it is not an introduction for mathematical neophytes. The authors take detours (which sometimes are looks ahead) from the main path of development that the sophisticate will enjoy but the novice may not be able to recognize as detours. Examples are the geometry of numbers (introduced in chapter 3), the Farey dissection of the continuum, and trigonometric sums. The authors also present deeper material than is usually

considered an introduction. Their presentations are excellent but require sophistication for the following topics among others: quadratic fields, generating functions of arithmetical functions, Selberg's proof of the Prime Number Theorem, and Kronecker's theorem. This is a book to buy and keep provided you have the necessary mathematical sophistication. Final note: this book nicely complements Apostol's Introduction to Analytic Number Theory.

- This book really knocked me for a loop! I was not expecting a "page turner" that wouldn't let me go, but it was. I have not had such enjoyment from a book in a long time.

Imagine going back after you are finished and rereading sections just for pure pleasure. I am a great fan of Preston & Child. I like their individual books too. I liked "Utopia". But this one is in another league all together. I think that anyone who tells you more about the plot than the book jacket does is doing you a great wrong. Among other things this is a good "who done it?" Child manages to prolong the uncertainty for a very long time - almost right to the end. But it is a lot more than a mystery. It's a love story, in fact several love stories. It's also a philosophical treatise - what, really is a man or woman? What is love? What does it mean when we say two people were "made for

each other"? Child also poses the reader a puzzle in his acknowledgement section at the beginning: he states that Douglas Preston wrote one of the chapters. My guess is its the epilogue. What will be your guess?
