REVIEW OF GRADE 12 LIFE SCIENCE PAPER MARCH 2014

- All about a spoiled kid who comes for a visit. Author writes a

wonderfully lyrical story that provides fun for both the reader and listener. I especially liked the lesson to be learned of manners that manages to be imparted in such a fun way for kids.

- Because English isn't my mother language, it's not easy for me to come up with forty synonyms for bad, but they would all be deserved. The author clearly doesn't know the difference between server and client, or between parent and child process for that

matter. I know this is hard to believe, but the author clearly doesn't have a clue what a socket is (the server listens for sockets, the client sends sockets <sic>). 10 pages of ./configure output just to get the pages filled are a waste of paper, but at least don't contain too many errors. The name McGraw-Hill on the cover doesn't seem to guarantee any quality any longer. I'm sorry I saw the first review too late.
