REVIEW OF DISCRETE MATHEMATICS AND ITS APPLICATIONS 7TH EDITION SOLUTIONS

• Where is Stillwater? The Name of the book I am reviewing is called Mr. Popper's Penguins by Richard and Florence Atwater. The location in where Mr. Popper's Penguins takes place is in a small town called Stillwater. I am pretty sure that Stillwater is a town I'm just not sure where. The First One Mr. Popper's Penguins starts out as Mr. Popper being a house painter at the end of September and stopping because no one wanted their house painted any more. Mr. Popper loves to read about the North and South Poles, mostly about the South Pole because penguins are there. One day he sent Admiral Drake a letter about pictures Admiral Drake had brought back from their last expedition. A few days later Mr. Popper gets a huge crate saying THIS SIDE UP on the side. He opened the crate and to his surprise a penguin looks up at him. Soon the penguin gets a name which is Captain Cook. Captain Cook and Mr. Popper get into all sorts of mischief, For Example; Captain Cook goes and eats two live goldfish. To find out all the other ones you will need to read the book. Newbery Honor The medal this book holds is true in my opinion; the medal it holds is the Newbery Honor Medal. I really liked this book for some parts where you want to laugh, like when Captain Cook slides up and down the bathtub pretending it is the icy Antarctic ground. Or when Captain Cook gets tangled up with a photographer's camera when he is trying to get a picture of the mischievous penguin. Then there are some parts where you don't know what will happen, For Example; When Captain Cook gets sick and has a temperature of 104 degrees. Or when Mr. Popper

gets thrown in jail, which is like the climax of the book. There are a lot more feelings in this book but I won't give them all away. You Have To Know This! I would just like the readers of this to know is that; This book may not lead you to the ending you might have wanted, you don't really have to know anything about penguins to read this book because it will tell you a little, and this book is on my top three recommendation list. I also want to say this book is about a 4th to 6th grade reading level because of its vocabulary. A Must Read I would put this book on my 2 out of 3 book to read because its just a great story and pretty funny too. I would recommend this book to every kid I know that likes a laugh or two. I think Mr. Popper's Penguins deserved the Newbery Honor Medal.

• Have you ever read a book by the authors Richard and Florence Atwater. Well, there's a book called Mr. Popper's Penguins. The book is illustrated by Robert Lawson. There are a lot of characters, but I'm just going to tell you the main characters, Mrs. Popper, Mr. Popper, Mr. Greenbaum, Admiral Drake, Greata, Captain Cook, Columbus, Victoria, Neison, Jenny, Magellan, Adedina, Bill Popper, Janie Popper, Scott, Isabella, Ferdinand, and Louisa. This story is about a man that gets a penguin and all of the events that happen. The man works as a painter. He loves the Antarctic and he mostly likes penguins. I'm just going to tell you one scene and it's very funny. Two Penguins were fighting, one won, but the other one got up and beat him up. I think you should read it because it is very funny and exciting. If you want to find more information read other book reviews or read the book.
