## **REVIEW OF INTRODUCTION TO BIOMEDICAL ENGINEERING BY MICHAEL M DOMACH**

- There are two of these books, Ladies with Prospects and Ladies with Options. "Options" is the first book and introduces us to the "Mostly Methodist" women's group. Quite by accident they decide to start investing a little money just to do something a little different. The results are a hoot! Get "Prospects" too and round the story out--both are good reads.

- This book gets right to the heart of the vocation crisis in America. Many vocations here are destroyed by a formation faculty that promotes back-stabbing and tattle taleing rather than fraternal charity. This same faculty also promotes psychological "counseling" as the cure-all rather than fostering spiritual and community support which also destroys many good vocations. This craziness is why there is so much bitterness between and among faculty members and seminarians and the reason for many departures from the seminary (including my own in recent years).
