This book describes the logistical systems and requirements of the North Korean People's Army and Chinese Communist forces during the Korean War. The author examines the performance of the Communist logistical system from June 1950 to July 1953, explaining the failure of the United Nations air interdiction campaign in terms of the constant improvement of Communist logistical capabilities. The author concludes that the United Nations air force damaged, but was unable to destroy, the Communist distribution system. The North Koreans and Chinese Communists were able to supply their front line units sufficiently to enable them to conduct a strong static defense, which prevented a United Nations victory, and in the last months of the war, to mount strong, sustained offensive actions.

Unexploded military ordnance and toxic chemicals, some dating back to the two World Wars, are a global concern, especially when former military bases are redeveloped for housing or other civilian uses. Internationally, there are the added challenges of cleanup of battlegrounds and minefields. Experts estimate that the United States alone could spend between \$50-250 billion to clean up these sites, many of which are in areas of high population density, where the demand for land for development is high. This book is unique in providing detailed guidance for cleaning up military ordnance sites - listing explosives, chemical warfare materials and breakdown products which can contaminate soil and groundwater and the tests needed to detect them, as well as cleanup techniques. Also included are remote sensing techniques, geophysical techniques, safety issues, the particular challenges of chemical weapons, etc. The author illustrates these techniques with case studies, including former battlegrounds in Europe and Asia, storage and waste disposal sites in Russia and former Soviet territories, and an extended study of the remediation of the large and complex Spring Valley site in the District of Columbia,. The second edition has been fully revised and updated, and also includes new and expanded sections on: geophysical techniques for discovering buried ordnance underwater sites and remediation techniques use of robotics, including remotely operated vehicles compliance and regulatory issues guidance documents from US Department of Defense and other sources The focus on test procedures, environmental remediation techniques, and learning from past case studies, makes Albright's book the most comprehensive and practical guide on the market for a topic of international importance. The only book available with clear and complete guidance for the cleanup of military ordnance sites and battlefields. The author illustrates his recommendations with real world cases including Spring Valley, DC, former battlegrounds in Europe and Asia, and storage and waste disposal sites in Russia and other former Soviet states. An essential reference for the test and environmental remediation procedures required to put former military sites back in to civilian use (e.g. housing). 30% revision, with key updates concerning regulatory changes, US Dept of Defense guidance documents, use of robotic vehicles, underwater sites and discovery of buried ordnance.

This edited book presents an array of approaches on how human factors theory and research addresses the challenges associated with combat identification. Special emphasis is placed on reducing human error that leads to fratricide, which is the unintentional death or injury of friendly personnel by friendly weapons during an enemy engagement. Although fratricide has been a concern since humans first engaged in combat operations, it gained prominence during the Persian Gulf War. To reduce fratricide, advances in technological approaches to enhance combat identification (e.g., Blue Force Tracker) should be coupled with the application of human factors principles to reduce human error. The book brings together a diverse group of authors from academic and military researchers to government contractors and commercial developers to provide a single volume with broad appeal. Human Factors Issues in Combat Identification is intended for the larger human factors community within academia, the military and other organizations that work with the military such as government contractors and commercial developers as well as others interested in combat identification issues including military personnel and policy makers.

In the aftermath of the euphoria brought on by our military victory in the Persian Gulf War, is the realization that we still have much to learn. The Persian Gulf War appears to have validated the quality of U.S. doctrine, leadership and military prowess. It showcased the technical superiority of our equipment, and confirmed under fire the courage and competence of our soldiers, sailors, airmen, and marines. Yet, even in an overwhelming victory there are painfully hard lessons to be learned, or in the case of fratricide, relearned. Perhaps no other aspect of our failures strike the military psyche harder than fratricide. This study will suggest that we do not have to accept the fratricide statistics of the past, however factual, as inevitable of future U.S. conflicts. It will propose that the facts of fratricide should be gathered not as a casualty prediction planning tool, but as a focus to design training and operational procedures, which in conjunction with advanced technology will work towards the significant reduction if not the elimination of fratricide from attack helicopter fires.

The term "friendly fire" was coined in the 1970s but the theme appears in literature from ancient times to the present. It begins the narrative in Aeschylus's Persians and Larry Heinemann's Paco's Story. It marks the turning point in Homer's Iliad, Virgil's Aeneid, the Chanson de Roland, Stephen Crane's The Red Badge of Courage and Tim O'Brien's Going After Cacciato. It is the subject of transformative disclosure in Jaan Kross's Czar's Madman, Ron Kovic's Born on the Fourth of July, O'Brien's In the Lake of the Woods and A.B. Yehoshua's Friendly Fire. In some stories, events propel the characters into a friendly-fire catastrophe, as in Thomas Taylor's A Piece of this Country and Oliver Stone's 1986 film Platoon. This study examines friendly fire in a broad range of literary contexts.

How did die become kick the bucket, underwear become unmentionables, and having an affair become hiking the Appalachian trail? Originally used to avoid blasphemy, honor taboos, and make nice, euphemisms have become embedded in the fabric of our language. Euphemia traces the origins of euphemisms from a tool of the church to a form of gentility to today's instrument of commercial, political, and postmodern doublespeak. As much social commentary as a book for word lovers, Euphemia is a lively and thought-provoking look at the power of words and our power over them.

*An Anthology* Houghton Mifflin Harcourt

Cutting through all of the controversy and conspiracy theories about Israel's deadly attack on the USS Liberty in June 1967 at the height of the Six Day War, Cristol revises his well-regarded book about the event with a complete, in-depth analysis of all of the sources, including recently released tapes from National Security Agency. When the first edition of The Liberty Incident was published in 2002 there remained many unanswered questions about Israeli Air Force audio tapes intercepted by the NSA. Some alleged they would prove that the Israeli attack was premeditated. Cristol's successful Freedom of Information Act lawsuit against the National Security Agency, while resulting in the release of those tapes, has been greeted by anti-Israel sources insisting that the NSA tapes are fraudulent and are part of a larger conspiracy to deceive the American public! After a quarter of a century of intensive research in Israel and the U.S., researching all relevant archives from NSA, CIA and the State Department, reviewing both formerly classified and open source documents, and interviewing all then-living individuals directly involved in the incident, the factual and documentary record is clear. Cristol maintains that despite the fact that all of the official records and transcripts are now available for review, the truth has proven to be of no interest to those individuals and organizations who are motivated by hidden agendas, wish to keep conspiracy theories alive, or are trying to feed sensational stories to the media. Documenting his findings in six new chapters, Cristol establishes in THE LIBERTY INCIDENT REVEALED that the Israeli attack was a tragic mistake and presents a convincing argument that will be regarded as the final story about this incident.

The second volume in a trilogy chronicling the liberation of Europe during World War II focuses on the Allied campaigns in Sicily and Italy, detailing the bloody battles at Salerno, Anzio, Monte Cassino, and more under the command of controversial Lt. General Mark Clark, as well as the June 1944 liberation of Rome. By the Pulitzer Prize-winning author of *An Army at Dawn*. Reprint. 150,000 first printing.

*Lucky War* McFarland

Three distinguished USAF Generals offer their wisdom on Aerial Interdiction. In the long evolution of American air power in the twentieth century the professional experiences and judgments of these senior air leaders are both representative and instructive. Over one hundred years of military service are contained in this oral history interview, almost all of it concerned with the application of a new kind of military force—air power—to the oldest of military questions: how to defeat enemy armies. In discussing their experiences in World War II, Korea, and Vietnam, these men focus on those air campaigns which have come to be considered classics of air interdiction: in World War II, Operation Strangle in Italy, March-May 1944, and operations in support of the Normandy Invasion, April-June 1944; in the Korean War, all campaigns, especially Operation Strangle, May-October 1951; in the Vietnam War, the air interdiction part of the Rolling Thunder air campaign, March 1965-November 1968, the air campaign in Southern Laos, 1965-1972, and especially the air interdiction portions of Linebacker I and II, May-October and December 1972. In addition, the discussion turns in the latter stages to the impact of electronics—laser guided weapons, electronic suppression devices, drone air planes, and immediate air intelligence—on air interdiction operations. Generals Partridge, Smart, and Vogt offer definitions, clarifications, examples, generalizations, and advice. Their purpose, and that of the Office of Air Force History, is to further the dialogue among military professionals so that the past can help us to meet the challenges of the future.

Fratricide, or 'Friendly Fire', is a persistent and unwelcome feature in war. Can it be avoided? How can it be properly understood? Beginning with a historical analysis, *Fratricide in Battle* examines all aspects of the problem, covering both human and technical factors, before looking at a range of measures currently in use to tackle the issue. Charles Kirke brings together an international group of experts in the field, from both military and academic backgrounds, to provide a thorough examination of this crucial subject. Taken together, their contributions offer a comprehensive understanding of fratricide in its historical context and suggest important lessons for future generations.

On April 14, 1994, two U.S. Air Force F-15 fighters accidentally shot down two U.S. Army Black Hawk Helicopters over Northern Iraq, killing all twenty-six peacekeepers onboard. In response to this disaster the complete array of military and civilian investigative and judicial procedures ran their course. After almost two years of investigation with virtually unlimited resources, no culprit emerged, no bad guy showed himself, no smoking gun was found. This book attempts to make sense of this tragedy--a tragedy that on its surface makes no sense at all. With almost twenty years in uniform and a Ph.D. in organizational behavior, Lieutenant Colonel Snook writes from a unique perspective. A victim of friendly fire himself, he develops individual, group, organizational, and cross-level accounts of the accident and applies a rigorous analysis based on behavioral science theory to account for critical links in the causal chain of events. By explaining separate pieces of the puzzle, and analyzing each at a different level, the author removes much of the mystery surrounding the shutdown. Based on a grounded theory analysis, Snook offers a dynamic, cross-level mechanism he calls "practical drift"--the slow, steady uncoupling of practice from written procedure--to complete his explanation. His conclusion is disturbing. This accident happened because, or perhaps in spite of everyone behaving just the way we would expect them to behave, just the way theory would predict. The shutdown was a normal accident in a highly reliable organization.

## REVIEW OF AMICIDE THE PROBLEM OF FRIENDLY FIRE IN MODERN WAR ILLUSTRATED

- Oh, my do I love this book. I'm not that into plain recipe books because, really, there are zillions of recipes on the Internet. So, when I look for a cookbook, I also look for something that has stories, theories, history, culture and so on. This book is delightful, not only are there lovely stories about the author's experiences, it is also filled with Greek history, anthropology, and culture. And the recipes? I only tried a couple of recipes in the book so far and they were just absolutely popping with flavor.
- I have loved this book for a number of years - and recently cooked a whole dinner from the book for a friend who shares my love of greek food. So I purchased this as an early birthday present for her. Thanks for the speedy mailing and a great conditioned book! Jan Archer, Grass Valley, Ca. ( a transplanted Brit)
