REVIEW OF ILLUSTRATED TEXTBOOK OF PAEDIATRICS 4TH EDITION

• Jeez, aside from about 30 pages of goodness about Steve McQueen and a few old-time H/A stories-which are told using lame-o aliases and seem to be recalled through a certain haze...this is just a steamin' pile of crap. Crap I could hear if I went to the gaywad leather bar in my town. What can I

say, I have all the respect in the world for Barger, the H/A's, whatever, but I didn't pay money to read about a yuppie's BMW road trip. Seriously. I just expected better from somebody who has better stories than this (really, he's gotta have better stories...Son-come on, you don't have better than this??). I just kept thinking that Barger just really didn't want to be doing this, and it came down to these two nutsucker ghost-writers grasping at straws.

- Virgil Copeland's little conspiracy is turning into a nightmare. When he and his colleagues smuggled a few LOVs to Earth and used themselves as test subjects, Virgil never suspected that two of his friends would soon be dead, and he himself on the run from international law, on his way to the place where the mutant LOV colonies made landfall... "A Limit of Vision" is confused. In the beginning it tries to be an edgy, sci-fi thriller, but soon slows down to a crawl and attempts to be a hard SF novel. The beginning features a moderately exciting escape sequence, a satellite crash, and a

tidal wave, all in about fifty pages. Then the plot abruptly stops. All characters quickly and conveniently sort out into heroes and villains. The heroes suddenly become shallow and predictable, and what they're doing isn't very exciting: they farm the surviving LOVs in fish ponds, while the outside world tries to starve them out of their little reservation. "Limit of Vision" treats its general subject matter - LOVs, an intelligent form of nanotechnology - in an extremely simplistic and straightforward manner, with no ambiguities. Despite having an incredible knack for mutation and problem-solving, they don't seem to pose any threat at all, and their "mind-enhancing" capabilities are hardly taken advantage of. The book's tone is essentially dead. The narration moves quickly, but leaves no lasting impression. Characterization is lacking and follows predictable patterns: a blossoming romance between the male and female heroes (who would've thought!); an enemy who becomes an ally, etc. In a nutshell: lacking in both premise and execution.
