Genetics and Etiology of Down Syndrome Springer Science & Business Media

A consummate classic with a fresh approach to pediatric dermatology Children's skin is different. Maturation affects the epidermal barrier, the cutaneous microbiome, adnexal structures, vasculature, and transcutaneous absorption of drugs. The immature skin is more susceptible to pathogens

and environmental disruption. Many genetic disorders are either present at birth or manifest early in childhood. Skin diseases thus present differently in children than in adults. Pediatric dermatology has seen significant advances over the last decade, particularly in the field of molecular genetics research, which has furthered our understanding of the pathogenesis of many skin diseases and the development of new approaches to treatment. This fourth edition of the Harper classic provides state-of-the-art information on all aspects of skin disease in children. It covers the diagnosis and treatment of all conditions - both common and rare - with a consistently evidence-based approach. Existing content has been refreshed and fully updated to reflect emerging thinking and to incorporate the latest in research and clinical data - especially at the genetic level. This new fourth edition includes: Greater focus on the genetics behind skin disease, including new genes/genodermatoses, progress in genetic analysis, and stem cell transplants Increased coverage of lasers and other technologies used to treat skin disease More summary tables, learning points, tables of differential diagnosis, and clinical algorithms for diagnosis and management Additional online features, including patient information links and multiple choice questions Harper's Textbook of Pediatric Dermatology delivers crucial clinical insights and up-to-date research information that spans the breadth of the field. As the most comprehensive reference book on this subject available, this revised fourth edition will support and guide the daily practice of both dermatologists and pediatricians across the world.

REVIEW OF COMMON SKIN DISEASES IN CHILDREN DIAGNOSIS AND MANAGEMENT

- This was not good literature based on three main reasons. I wasn't very interested while reading this book because it was first upsetting, secondly the ending was not what I expected, and finally it is disgusting. It was upsetting because they had no feelings for little children. If you were a twin they would weigh you and if you weighed less you would be released. Also, the ending wasn't good at all because it just ends, when you want to know more. Some of the memories the Giver transferred were disgusting. For example, when Jonas was sledding and hit a tree and he saw his own flesh and was bleeding. A quote to support my answer is then ending of the book, " Behind him, across a vast distances of space and time, from the place he had left, he thought he heard music too. But perhaps it was only an echo." The way the book ended was confusing because it seemed that there should be more too it, but there wasn't. As you can see, this text is not good literature.

- The Giver was a good book because it you did not know what was coming next. It was very unique its own way! I enjoyed to see how people would live in a Utopia.
