REVIEW OF HOLT MCDUGAL ECONOMICS TEACHERS EDITION

- In Autumn: The City (follow up to Autumn), a new group of survivors is introduced. With transportation and communication lines down, they're essentially trapped within the city itself. Hiding in offices and other city buildings, they scavenge for food and fight to survive. When a soldier joins their ranks, they finally begin to see a bit of hope on the horizon, but the future of mankind is still uncertain. The human element is such that while we want to believe that hard work and persistence will pay off, no one can deny that stress and limited resources would cause more chaos.

The question that comes into play is whether the survivors in Moody's series can get through that and figure out a way to make it through or if they -- and not the dead -- will be their own downfall in the end. The build in this series is interesting. Autumn started in one place with one group of survivors, The City introduces a new set. Without giving anything away, I'm definitely interested to see where the next one will pick up.

- A superb book that explains what the mobile Internet really is all about in a very straightforward way. Mr. Andersson's book has been extremely valuable for me explaining the technologies behind the companies I meet in my work as an equity research analyst. I recommend the book to anyone that wants to understand both the opportunities and the risks associated with mobile Internet applications development.
