REVIEW OF MOTHERBOARD GIGABYTE Z270P D3 MINING ZCASH FORUM

- I decided to read 1984 because every single book list on the web recommended it on its top twenty. I can now see why! This book seems to me to be the basic foundation for every revolutionary idea, rebellious thought, or conformist ideology that was written in our modern time. I was mesmerized, betrayed, bewitched, and baffled by how real it felt especially since the world today is

witnessing similar kind of revolution in the shape of the Arab Spring. It was a wonder to equate this work of fiction into reality and ponder if the very revolution he depicted can be stifled through the destruction of the human spirit.

- This is the second time I've been forced to read this book for a class, and I have to ask, "What's the point?" Maybe if you live in a country that's a monarchy, this book's worth reading, but this is *America*, ok? The whole reason we live in a democracy is so that we the people don't have to worry about things like this. "Brave New World" played up the

science fiction aspect of it's "futuristic" setting, and I thought that book worked much better. Orwell's lecturing on politics was ok one time around ("Animal Farm"), but this book gets so bogged down in a million issues that just don't matter ("double-speak?" Who cares how people choose to talk-- we should be able to talk to each other however we want) and gets lost. If you want to read Orwell when he actual has something to say, try "The Road to Wigan Pier," which acutally is enlightening, not this preachy homily of something that never happened. It's 2000. 1984 was a bad movie with Michael J. Fox.
