## **REVIEW OF BERNDT PRACTICE OF ECONOMETRICS SOLUTIONS**

- This book is really very beautiful. I have transgressed Asian and southwestern design and this book is just what I wished for.

• First off, let me state that I am so glad I am in far into college now. Luckily, I was in 4th grade at the right time I bought this from one of those Scholastic order sheets (remember those?), almost ten years ago before special interest groups got on the "ban everything we deem offensive or intelligent to children" bandwagon. Anyways, I recently found this book in a box of old books and, looking through it, it was just as chilling to the spine now as it was around 8 or so years ago when I was a wee lad. Of course, now I'm 19 and the stories seem sort of not so scary, but that's just my picky-eating with dark literature (being more accustomed to Lovecraft and more sophisticated horror and all that). However, the charcoal drawings are what make this book what it is. Stephen Gammell (does he have an online gallery or a book full of illustrations like this? i'm soon checking!) has done an excellent job at creating immensely subtly-disturbing visuals with his illustration skills that seems to amplify the effect of the otherwise cheesy (but still fun) bonfire horror stories. If the stories don't scare the bejesus out of you, the ghostly apparitions and deformed nightmarish landscapes portrayed within the illustrations will definately make you want to buy several halogen lamps and keep them turned on at night with

perhaps a garlic necklace around you when you go to sleep. If I recall, the scariest illustration was a full-page charcoal drawing next to a story called "Oh, Suzannah!", almost like something weird going on in a parallel supernatural dimension from some mental patient's hallucinatory nightmare. Either way, this book has redeeming qualities for both folk/urban literature enthusiasts as well as dark-fantasy-art enthusiasts. I heavily recommend it!
