REVIEW OF T5 FINGERPRINT ACCESS

CONTROL

- I have a few reasons for claiming that this book is the greatest political work of the English language. First, it talks about the time in which it was written. The world in the 1930s was continuing its mechanization. In much of Europe and beyond, men were becoming robotic in military, industry, and commerce. Life was changing to fit technology and less the other way around. Second, it talks about the timeless. Freedom of indulgence but silence of criticism? Look at our news and you'll find it. Childish pursuit of pleasure but denigration of soulful happiness? Sex plentiful but meaningless, a game? There are fart jokes on TV but menstruation is gross. People want to smoke in public but breast-feeding should be kept private. Sexuality has been neutered and sanitized. It's a joke. It's playful and not powerful. Life's extremes have been eliminated and replaced with comforting blandness, meaningless, immaturity. And the pundits who champion such immaturity smile at us, smug at what they call progress. The past, they assure us, was barbarism. But this is not why I love the book. I love the book because Huxley, in his cynicism, shows us this scene. Marx is told that he can go to live with the outcasts and he refuses. He can't imagine leaving the world he hates. He wants the world to cater to him but the notion of leaving that world is terrifying. And that is what makes the book so realistic. Those who would reform our world are still so tied to it that progress could quite possibly be doomed. It's one thing to demand a change, but to suffer the consequences? Look at all the revolutionary elements of Western society and you'll see the same interest in change but refusal to pay. I say this as a radical.

This book makes clear the threat of dictatorship but at the same time criticizes those who would attack the system. This book challenges us all. Right, left, rationalist, religious... We're all part of the dark Brave New World. If you're interested in any types of

politics, read this book and think about it.

- Interesting book; read it in high school some 60+ years ago and to see some of his fiction become a reality is amazing.
