REVIEW OF PCA NOTES ON ACI 318M 11 METRIC

- It has amazing pictures. I saw some basket hilt designs I had never seen before. The offerings in the modern sword reproduction market for basket hilt swords are very slim compared to the styles that have existed historically. The book is about \$100 so it is not cheap. It has numerous pictures on every page. My critique of it is that it only shows the baskets. The should

have had two pictures of every sword. One with as close up of the basket and one of the whole sword. Perhaps more pictures where the basket hilt is not symmetrical on both sides. They should also give statistics of the weight, length, point of balance, profile and distill taper measures. Modern sword collectors and practitioners are very acutely aware of the meaning of these statistics and what they mean to performance. The book is written from the museum curator's point of view, not the practicing swordman's.

Perhaps a second edition will step up to a more advanced level.

- It is as though we are moving through the streets of Florence with Mr. Levey at our side telling us fascinating stories about the people and places of the city by the Arno. Anyone with an interest in Florence will find this volume a wonderful companion to the larger histories and art books. We are the beneficiaries of the author's lifetime of experience and understanding in the matters of the Renaissance and its center, Florence. Highly recommended.
