Conquering the dating market—from an economist's point of view After more than twenty years, economist Paul Oyer found himself back on the dating scene—but what a difference a few years made. Dating was now dominated by sites like Match.com, eHarmony, and OkCupid. But Oyer had a secret weapon: economics. It turns out that dating sites are no different than the markets Oyer had spent a lifetime studying. Monster.com, eBay, and other sites where individuals come together to find a match gave Oyer startling insight into the modern dating scene. The arcane language of economics—search, signaling, adverse selection, cheap talk, statistical discrimination, thick markets, and network externalities—provides a useful guide to finding a mate. Using the ideas that are central to how markets and economics and dating work, Oyer shows how you can apply these ideas to take advantage of the economics in everyday life, all around you, all the time. For all online daters—and for anyone else swimming in the vast sea of the information economy—this book uses Oyer's own experiences, and those of millions of others, to help you navigate the key economic concepts that drive the modern age.

REVIEW OF A CONCISE GUIDE TO MACROECONOMICS SECOND EDITION WHAT MANAGERS EXECUTIVES AND STUDENTS NEED TO KNOW

- When someone is intentionally deceptive in order to sell books or to capture an audience this lowers the value of what they have to say to absolute zero.
- Most of the story you could have guessed at and unless you were deaf, dumb and blind you were not really shocked as to how the story ended. Still not a bad little book. I would recommend it. I still like Dr. Kay even after all this time.
