The real scientific reasons why everything always goes wrong. Start looking for Murphy's Law, and you'll find it everywhere. Buses go round in threes, the queue you join always goes slowest, when your hands are full your nose starts to itch, you think of 10 important things to remember just as you are falling asleep . . . Can there ever be a rational explanation? The answers turn out to be one part scientific to three parts psychology. The world has changed a lot in the last 4000 years, but our brains haven't. So, again and again we find our reactions are just plain out of date. Why do you take the same wrong turning every single time? Why, when you lose something, do you keep looking in the same place over and over? And why is it suddenly there the twentieth time you look?

'I know no place where firm and paternal government would sooner produce beneficial results than in the Solomons ... Here is an object worthy indeed the devotion of one's life'. Charles Morris Woodford devoted his working life to pursuing this dream, becoming the first British Resident Commissioner in 1897 and remaining in office until 1915, establishing the colonial state almost singlehandedly. His career in the Pacific extended beyond the Solomon Islands. He worked briefly for the Western Pacific High Commission in Fiji, was a temporary consul in Samoa, and travelled as a Government Agent on a small labour vessel returning indentured workers to the Gilbert Islands. As an independent naturalist he made three successful expeditions to the islands, and even climbed Mt Popomanaseu, the highest mountain in Guadalcanal. However, his natural history collection of over 20,000 specimens, held by the British Museum of Natural History, has not been comprehensively examined. The British Solomon Islands Protectorate was established in order to control the Pacific Labour Trade and to counter possible expansion by French and German colonialists. It remaining an impoverished, largely neglected protectorate in the Western Pacific whose economic importance was large-scale copra production, with its copra considered the second-worst in the world. This book is a study of Woodford, the man, and what drove his desire to establish a colonial protectorate in the Solomon Islands. In doing so, it also addresses ongoing issues: not so much why the independent state broke down, but how imperfectly it was put together in the first place.

REVIEW OF LIVRE DE MATH 5EME MYRIADE

- This is the kind of travel/spirituality book that I read over and over - a few pages at a time - to get a glimpse of America and a spoonful of spirituality at the same time. Moon did something every American should do - travel the country and talk with our countrymen. His reflections on his findings are why I keep going back.
- While browsing the amazon.com site, I came across this book by accident. After reading an excerpt, I knew I had to buy it. It made me laugh out loud. Before now, I had never really known the 'real' Frank Zappa. All I did know was that I never liked his music and he had given his children odd names. This book is filled with self-deprecating humor and gives a personal account of how he became famous, or infamous. "The Real Frank Zappa Book" is very amusing and gives an inside look into this very complex

man's life.
