This is the HARDBACK version. Buck Rogers in the 25th Century (1979-1981) premiered on American television in September 1979. The story followed a twentieth century astronaut revived after 500 years of suspended animation to become Earth's greatest hero. Created by Glen A. Larson and Leslie Stevens, the new series starred Gil Gerard, Erin Gray, and Felix Silla. Gerard looked to the past to prepare for his future production. As Executive Producer of another science fiction series, Battlestar Galactica (1978-1979), the early cancellation of the failed series left him with a quasar of props, costumes, sets, special effects film footage, and even a rejected model spacecraft designed by Ralph McQuarrie. He hit on the idea of recycling the artifacts into a less showy series that premiered to the delight of audiences. Viewers thrilled to a seemingly endless parade of notable guest stars, such as Henry Silva, Joseph Wiseman, Jack Palance, Roddy McDowall, John P. Ryan, Richard Lynch, Cesar Romero, Frank Gorshin, Julie Newmar, Jamie Lee Curtis, Vera Miles, Sam Jaffe, William Smith, Sid Haig, Jerry Orbach, Richard Moll, Ray Walston, Gary Coleman, Amanda Wyss, and Mary Woronov. Join Buck and the galaxy's most beautiful women in a richly researched work that soars at light speed beyond other Buck Rogers books with: Foreword by actress Erin Gray A complete episode guide Interviews with the full regular cast and crew Actors that portrayed characters such as The Space Vampire, The War Witch, and The Satyr tell all about working on the series. Discover a never before explored nebula of back stories: How a nervous film student with no credits wound up directing an episode Which future US President was a friend of Gil Gerard and hosted the premiere Which Buck Rogers guest star was murdered and immediately played in a TV movie by another BUCK ROGERS guest? Why Buck Rogers went to war with his own show's writers Which Buck Rogers guest became a director and discovered Julia Roberts Why Dr. Theopolis and nuclear hellhole Anarchia were cut from the show How Sid Haig appeared in four episodes, even though he died in the first two Patrick Jankiewicz is the author of You Wouldn't Like Me When I'm Angry: A Hulk Companion, and Just When You Thought It Was Safe: A Jaws Companion"

The Palace Program is now in full effect. Sirius O'Sullivan, the Palace director has been repurposed outside of the current reality thus leaving a gaping opening for the next in line to see the Program through to the final phase. Meanwhile, Mary escapes the battlefield with the Eagles squad intel specialist Dale. After seeing the battle has not gone in their favor, they retreat into the depths of the Palace. Leaving Mary to live with the fact that she left many men and women to die by her orders. Sirius is no longer around to bother her in the physical form but he is still inside of her head, egging her own and tormenting the choices she has made. David, a callous, deviant of a man steps back into the picture to set things right in the world. But, he has plans outside of Sirius immediate goals. He rules with an iron fist and uses Teacher Simon in an attempt to track down and bring Mary back into the hands of the NCP group. Lonnie is tasked with the job of helping track down Mary along with Teacher Simon. The young military upstart is chomping at the bit to prove himself further to the Order. In his mission to prove his worth, Lonnie learns more about those from elsewhere than he ever wanted to know. Shaken by lost, confusion, and an ever-changing body that beckons her to bring misery and pain to those that sought to shackle the planet, Mary struggles to choose the correct route. Traversing a planet long forgotten with Dale and a young man by name of Branden, she has to decide if doing what's right for everyone is worth losing herself. *Tomorrow's End is a high intensity, self-introspective journey through a dystopian world on the brink of a revival or implosion. This book is Handmaid's Tale, Under the Dome, The Dark Tower, and The Maze Runner intertwined into a page-turning thriller that is sometimes scary and enlightening. J.M. Clark created a post-apocalyptic world full of suspense and gripping plot-twists.*

Tomorrow: a future only you can see; a future only you can save... When fifteen-year-old Luke's father dies, his eccentric family threatens to descend into chaos. Luke distracts himself by helping to sort through his father's belongings, a painful process which takes on an entirely new dimension when he discovers that his father had somehow had knowledge of events in his own future. This prescience is connected in some way to a recent spate of terrorist attacks, which would explain why security forces - and others - start to take an interest in Luke's discovery. Just what had his father known, and why are Luke and his friends suddenly at the centre of it all? Tomorrow: an emotion- and time-tangled thriller set in the War Against Chronological Terror. Tomorrow: when three teenagers may have the power to save or destroy a world that is yet to be. Praise for Nick Gifford's work: 'The king of children's horror' - Sunday Express "Another great teen thriller." Spot On "Ingenious ... this chilling story reads with all the power and demented logic of a thoroughly bad dream." The Independent "A contemporary thriller with overtones of Orwell and Huxley about it." Rhyl Journal "A story that genuinely chills and chafes at ethical and moral certainty... Erased is a real romp of a read. That it equips readers with an awareness of the mechanics of inhumanity must be a step towards ensuring history's mistakes are not repeated." Achukareviews

Tomorrow's People Springer

The U.S. economy is the envy of the world, and the key to its success is technological innovation. In this fascinating and in-depth account reported from three continents, Robert Buderer turns the spotlight on corporate research and the management of innovation that is helping drive the economy's robust growth. Here are firsthand communiqués from inside the labs of a reborn IBM, resurgent GE and Lucent, research upstarts Intel and Microsoft, and other leading American firms -- as well as top European and Japanese competitors. It was only a few years ago that competitiveness experts -- U.S. well-wishers and naysayers alike -- concluded that America had lost its business and technological edge. The nation's companies, they asserted, couldn't match the development and manufacturing efficiency of overseas rivals. Yet now the nation is humming along, riding an unparalleled wave of innovation. Buderer tells us this turnaround has come on many fronts -- in marketing, sales, manufacturing, and the creation of start-up companies. But Engines of Tomorrow deals with a central element that has gone largely unexamined: corporate research. It's the research process that provides the technologies that spur growth. Research is behind the renaissance of IBM, the stunning growth of Lucent, and much of the steamrolling American recovery. Focusing on the fast-moving communications-computer-electronics sector, Buderer profiles some of the world's leading thinkers on innovation, talks with top inventors, and describes the exciting technologies coming down the pike -- from information appliances to electronic security and quantum computing. In the process, he examines the vital strategic issues in which central labs play a determining role, including: How IBM's eight labs around the world figure in Lou Gerstner's plans to achieve consistent double-digit growth -- and to join GE as a \$100 billion concern. Why Xerox's famed Palo Alto Research Center is vying to resuscitate its company's lagging fortunes by sending anthropologists into the field to study the hidden ways people really work. What Hewlett-Packard will do without its original instrument business, recently spun off as Agilent Technologies. The business was central to HP Labs' MC2 philosophy of merging research expertise in measurement, computation, and communication -- and its departure removed a lot that was unique about HP. How the November 1999 federal court finding that Microsoft operates a monopoly hinders the Seattle giant's acquisition plans and makes it increasingly vital for nine-year-old Microsoft Research to lead the way in innovating from within. Could this be the next great lab for the twenty-first century? With authority and undaunted optimism about the underlying vitality of the research process, Buderer discusses these issues and reveals the future of some of the world's best and most powerful companies.

Tom Oakley experiences disturbing episodes of deja-vu and believes he is going mad. Then, he discovers that he's a "Walker" - someone who can transport himself to other times and places. Tom dreams about other "Walkers" in moments of mortal danger: Edward Dyson killed in a battle in 1879; Mary Brown who perished in the Great Fire of London; and Charlie Hawker, a sailor who drowned on a U-boat in 1943. Agreeing to travel back in time and rescue them, Tom has three dangerous adventures, before returning to the present day. But Tom's troubles have only just begun. He finds that he's drawn the attention of evil individuals who seek to bend history to their will. Soon, Tom's family are obliterated from existence and Tom must make a choice between saving them and saving his entire world. *Tomorrow's Guardian* is a Young Adult Fantasy Novel."

Polite Society Little, Brown

"So funny, smart, sophisticated, and captivating, you just want to spend your whole life with it."-- Kevin Kwan, author of *Crazy Rich Asians* In this modern reimagining of Jane Austen's *Emma*, Delhi's polite society is often anything but polite. Beautiful, clever, and more than a little bored, Ania Khurana has Delhi wrapped around her finger. Having successfully found love for her spinster aunt, she sets her sights on Dimple: her newest, sweetest, and most helpless friend. But when her aunt's handsome nephew arrives from America, the social tides in Delhi begin to shift. Surrounded by old money and new; relentless currents of gossip; and an unforgettable cast of socialites, journalists, gurus, and heirs, Ania discovers that her good intentions are no match for the whims and intrigues of Delhi's high society--or for her own complicated feelings toward her cherished childhood friend, Dev. Pairing razor-sharp observation and social comedy with moments of true tenderness, this delicious whirl through the mansions of India's dazzling elite celebrates that there's no one route to perfect happiness.

REVIEW OF THE TVS OF TOMORROW HOW RCA S FLAT SCREEN DREAMS LED TO THE FIRST LCDS SYNTHESIS

- The Book was great. I have enjoyed every one of the Sisterhood books. I am looking forward to Fren Michaels next book.
- The sisterhood is back again and this time it is Isabelle's turn at getting even. Isabelle waited long enough and now she is mentally and physically ready to go after what is most important to her. Getting her reputation and her life back in order. Everything was going perfect until that awful day she was driving with Rosemary Hersehy and the accident. As a result Isabelle lost her license, her business, her fiance, all her money and everything that meant anything to her. Now the sisterhood with the help of it's newest addition Jack and the wonderful planning by Charles, Isabelle is finally going to get another chance at life. From the moment you start this book knowing how the sisterhood works you wont want to put it down. It is fast paced and wonderfully written and I like that Ms. Michaels is bringing back a character from her one of her previous books (remember Nealy Diamond Clay the triple crown winner) and how she is going to help Myra and Charles with their latest plant. They have to bring down Rosemary and that is the sisterhoods goal and mission and it is accomplished wonderfully and the way it is carried out is a great surprise but in the end you get what you have coming to you. Again Ms Michaels hats off to a wonderful and enjoyable book.
