Thirty-seven samples were collected from the volcanic ash bed at Ashfall Fossil Beds State Historical Park in Nebraska for geochemical analysis. Two hypotheses were tested: (1) the tuff is from a single volcanic eruption, and (2) it is from an 11.93 Ma event from the Yellowstone hotspot. Major and trace element content was determined using

an Energy Dispersive X-ray Spectrometer (EDS) and an X-ray Fluorescence Spectrometer (XRF), respectively. Results showed one distinct chemical cluster, suggesting a single volcanic source. Using previously published data, the Ashfall tuff is tentatively correlated to a younger volcanic source, approximately 10.5 Ma.

## REVIEW OF ASHFALL

- This is a really great book. It is long but you will not want to put it down. I would suggest getting the movies too. The second and third books came out as the movie Children Of Dune. You will want to buy this!
- If you love politics, intrigue, and a marvelous world that just leaves you wanting more and more, DUNE is it. I have yet to meet a fellow Political Science major who didn't find these books inspired. If you don't like Dune . . . then you can check out the Dick and Jane books in the children's section.
