The Global Status Report on Road Safety 2018, launched by WHO in December 2018, highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years. The burden is disproportionately borne by pedestrians, cyclists and motorcyclists, in particular those living in developing countries. The report suggests that the price paid for mobility is too high, especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.

"You don't have to have a murdered sister to be a good homicide detective, but it helps." Finding Bethany, the best-selling Alaskan book, is a behind-the-scenes true crime memoir of murder and justice in the Last Frontier of Alaska. Finding Bethany is the true story of how, as a young boy, Glen Klinkhart was unable to save his sister from a heinous sexual homicide, and how he began his journey as a police officer to find the lost, the missing, and to bring those who would do evil upon others to justice. His career as a homicide detective takes the reader along as he travels from the brink of exhaustion and obsession and into the dark and evil world of sociopathic killers, and those who would do anything to help them. Finding Bethany details what real life homicide investigations are like, from his unique perspective as a victim and as a reluctant hero. The reader will experience the bizarre twists and turns down dark paths which result in macabre dead ends, and unexpected miracles found within the darkest of circumstances. His cases include the stories of people who were willing to give of themselves for someone they often didn't even

know. Finding Bethany is also about two brothers – one a sociopath, the other a good man whose own love for his evil brother had been exploited his entire life.

REVIEW OF MOVING AHEAD WITH ISO 45001 FOR SAFETY AND HEALTH AT WORK

- This is a book written by a general practitioner who became so enchanted with the power of hypnotherapy that he changed his specialty to accommodate his newfound love for psychiatry. Dr Barnett makes a bold move at creating and following a novel metaphor through out the book. He states that the mind is analogous to the criminal system and that through no fault of our own that prisons are created within our mind. He feels that there are many medical illnesses that have their origins within the 4 prisons mind. First, phobias are unresolved conflicts that have triggers that the patient attributes to the phobia rather than the unresolved conflict. The trigger produces anxiety, which is a manifestation of a powerful fear that imprisons the mind. The second is repressed anger. He states that suppressed anger is like a sleeping volcano that can erupt in the form of a headache, peptic ulcer, back pain, hypertension or obesity. The third prison is pain and sadness, which he feels central to the genesis of all emotional illnesses. He makes a convincing argument for the earlier the rejection, the more devastating the effects because the client has fewer resources with which to deal with it. Asthma, depression, drugs and smoking are attributed to rejection. The final prison is that of guilt which is consistently a potent factor in the production of emotional illness. Impotence, frigidity, obesity, skin diseases and suicide many times have their origins rooted to guilt. Dr Barnett makes the argument that a crime is any act that endangers the peace of society. The analogy here is that a crime of guilty is often self-imposed on children who interfere with their parent's harmony. He makes the bold move to suggest that many of these self-imposed crimes are perpetrated in utero. His argument makes sense even though it flies in the face of western medicine. He states that at least on a subconscious level, the child hears and feels what his parents say or feel about him. The most convincing argument for this is that of gender conflict. It makes sense that a child would have conflict with their gender if their parents were disappointed that they did not get the sex that they desired. This suggestion that they are not desired at birth, places the child into a prison of guilt as the child grows. Prisons of guilt and fear can also develop from similar circumstances. The court of the mind is similar to other court systems. When an

individual is accused of an emotional crime, his mind makes a decision that is binding and will determine that individual's future. This courtroom analogy goes further when delving into psychiatric evidence that we all operate from more than one ego state. To fully understand the complex metaphor the ego states must be reviewed. The three states of the mind are the child, the parent, and the adult. The child is the first state and is the feelings part of our being that provides drive and energy. The child ego says: "I like or I want." Very quickly the parent portion of the ego develops that is essentially mimicry of the child's parents. The function of the parent is to gather all information it can about the people in the immediate environment of the child so that they may respond in a harmonious manner. The parent ego says: "I should." The adult develops after years of maturing and is concerned with collecting information about the world and filing it for future reference. The adult ego says things like: "I can, or I will." In the court of the mind, the accused is always the child that is being prosecuted for an attribute that has caused offense. The prosecutor is usually the parent, usually the mother. The accuser is always someone within the child's immediate environment, who is distressed by who they are. The judge unfortunately in early life is the child's parent ego whose job it is to protect the child with its archaic methodology. The defense team is the child who thinks that they are only doing what is right for them. When the verdict comes from the parent ego state, a sentence is passed that ensures the crime will never recur. The punishment is always fashioned to fit the crime. If the expression of a feeling has been found unacceptable, the parent may decree that the sentence is to withhold any expression of that forbidden feeling. Often times the toddler verdict can be "you must not exist," "you must never feel angry," "you are not lovable," "you must not succeed," "you must not be afraid," "you must not love," or "you must not think." The implications of these decisions are long reaching and consistent with emotional problems experienced in adulthood. The decision is reinforced with guilt. Whenever the child thinks about performing the act, the immaturely developed parent ego state merely flashes the results of the last transgression on the child's emotional television screen and guilty foreboding occurs. The release from prison can only occur when the information is re-presented (re-trial) with the mature adult ego state as a judge and a pardon can be justly handed down. However the initial incident is deep in the bowels of the subconscious. Hypnosis is used to reveal the lost information to the adult so that a correct judgment can be determined. Often times this re-judgment can occur on a subconscious level and still be effective. Rehabilitation must also occur after the pardon. To resolve old bad habits, new positive reinforcement must be ongoing. Three rules need to be followed for rehabilitation to occur. First, they must promise to stop putting themselves or their feelings down. Second, the individual must promise to never again allow anyone to themselves or their feelings down. Third, they must never knowingly put anyone else down. The author goes onto justify how these prisons of the mind will manifest in physical ailments and detailed methodology on how a trained hypnotherapist can go about resolving these crimes. If a hypnotherapist is not available, he goes into detail on how self-hypnosis can help. The book concludes with case studies and information on how the power of the mind has been useful in healing disease. Overall, this was an excellent book with innovative thoughts that are far ahead of its time. The in utero development of the subconscious mind and the far-reaching effects of adverse parental interaction are definitely plausible.

- This phrasebook looks reasonable in most respects, but it has no Lao to English dictionary. That means, if you are trying to

communicate with someone who does not speak english, they cannot respond to you with words, even if they are motivated and patient enough to try to carry on a conversation. The description of this book said it had a "comprehensive dictionary".

Unfortunately, it only has half of a comprehensive dictionary. If you want a book that will make it possible to actually converse with a Lao speaker, this is not it.
