REVIEW OF DESIGN OF PELTON TURBINES IV NTNU

- Wow. I couldnt, and still cant, believe how amazing this book was. It is truly a masterpiece. Of course, what i think is a masterpiece might not end up being one for you. I realized during my read of this book that i felt really attached to it because of my own personal experiences...my own university background (political studies). To me, this book is a searing critique of the modern human condition...of modern society. When i read through these pages i found an author that was describing what was going on around us: people living in an unthinking comfort,

people almost consciously avoiding the obvious truth about society...people failing to open up their eyes. It really focuses your attention on how society can just turn its cheek to homelessness, poverty, consumer culture, capitalism. We are all taking part in the process of doublethink. I took all of this away from the book...you might not. It might even mean something different to you. This review is for myself, for others that see what i see, and for those who are willing to see what i see. Otherwise, you will have to read the book through your own lenses and decide for yourself whether this is a classic. But for like-minded people, you will understand how powerful this book is from page one. The only reason why it did not get 5 stars is because of the ending. I really felt it wasnt the right way to end this book. It just didnt seem to flow with the rest of the pages. I am a little disappointed that Orwell decided to finish this amazing novel with such a drawn-out, tired ending.

- This is a great book, as is Animal Farm. It's horrifying, enaging, and sad at the same time. I also love the language. Nineteen Eighty-Four is probably one of my favorite books ever.
