#### REVIEW OF COMPUTER NETWORKS FIFTH EDITION A SYSTEMS APPROACH THE MORGAN KAUFMANN SERIES IN NETWORKING

- Sometimes books written by adults using the first person voice of a child are cloying and insipid and insulting to children. This is not one of those books. Ms. Speltz takes a scary thing -- a parent's battle with cancer -- and turns it into a learning experience. Calmly and seemingly effortlessly she anticipates the fears, anxieties, and emotions of a young child and skillfully illustrates the questions a child may have and distills sometimes cold and frightening medical jargon and presents it in a way that children can hear and understand. At 15, my son is a little old for this book, but I am very glad to have read it because it gave me a lexicon for communicating things about my own cancer to family and friends in a way they will understand. It would be unfair for me not to compliment the illustrator of this book, Kate Sternberg, who did a wonderful job and helped keep the book light.

- I thoroughly enjoyed this book. So many fascinating details about the planes, flight procedures and complexity of navigation. As a bonus you get a useful introduction to the physics of flying as well as the history of navigation. My copy of the book already has two people signed up to borrow it!
