REVIEW OF COMBAT ENGINEER TRAINING MANUAL

- I love the Scarpetta books. The characters in these books seem so real, it is like you can get to know them and their habits. It almost feels like you become one with Kay, Lucy and Marino, you worry about what will happen to them next. I like how Jo's parents have to deal with her lesbianism, and how Kay tries to explain it to them. These books show just how screwed up this world can be, but how there is some good in the world, people just need to be more open minded. This book was a little bit more predictable than the others though, the plot leading up to what I knew would happen. I find that annoying, but still the book was very good. I can't wait for the next one to come out.

- I have read all of the Kay Scarpetta series, as well as Hornet's Nest and Southern Cross and, for the most part, I have enjoyed all of these novels. After Point of Origin, I was thrilled to see that Ms. Cornwell brought back Kay Scarpetta for another round. I was immediately drawn into the book, and especially liked the ability to see Kay Scarpetta grieving, showing that she is a human after all. I think the character of Kay Scarpetta was well developed, but after reading Black Notice, I don't think that Dr. Scarpetta would be a person I would like if given a chance to know her. She comes off as rather cold and uncaring, and I could understand how there would be others wanting to sabotage her. The Loup-Garou plot was fascinating, although I wish there had been more emphasis on this aspect of the book. I was disappointed by the ending which was very weak and unimaginative, and reminiscent of every other suspense novel or movie I have encountered. The ending certainly left room for another Kay Scarpetta novel, though, which I look forward to reading. Overall, this was not the best of the Scarpetta novels, but it certainly kept me turning the pages.
