I am a biochemistry student; Analytical Chemistry by Christian is a required text for the lecture portion of my techniques in chemistry. I wouldn't be that harsh on this book if not for the fact that the lab portion of the class requires Quantitative Chemical Analysis by Harris.

REVIEW OF ANALYTICAL CHEMISTRY G D CHRISTIAN 7TH EDITION

- Break-up into timed sections, question length and content and subjects covered pretty closely matched my exam, which I took 2 weeks ago. Answers to questions explain why one answer is correct and why the others are wrong. Also gives helpful test-taking tips and advice. Highly recommend it!
- As another reviewer said, a three star Wharton is really 10 stars compared to most other fiction material...of any age. There are enough lengthy synopsis type reviews of this book...another one is not necessary. But I will make a couple additional points:1) This should not be the first Wharton novel you read. It is just not compelling from the first to last page the way her 'big 3' (Innocence, Mirth, and my fave, Custom of the Country)are. The first half drags from too much time spent with excessive ruminating in the heads of the characters as she lays out their complexities and story line. However...2)The last third of the book more than makes up for it...and the final turn in the last chapter is right up there with her best. So it deserves 4 stars after all. Again...if you haven't read other Wharton works, don't start with this one. Not her best, but a worthwhile read if you stick with it.
