- Cox correctly outlines issues faced by Generation X, and he then brilliantly widens the picture to include God. He is both sociologically and theologically astute, and also very intuitive. Cox is

obviously very in-tune with his generation. In fact, I am sure he must have had me in mind when writing the book! It is full of the relevance and hope that Xers like me need to hear, and it has significantly deepened my understanding of God! I liked it so much the first time that I am now reading it again!

- Hong Kong Action Theatre! 2nd Edition is a game based on Chinese action films such as Crouching Tiger, Hidden Dragon and The Killer. It attempts to accurately portray the style of these films and tries to cover all the genres: kung fu, wire fu, gunplay, and so on. Players portray actors in Hong Kong cinema. Characters are created using Guardians of Order's simple Tri-Stat system, rounding out the character with skills like gun combat and kung fu and special attributes to set the actor apart like Director's Friend or Cantopop Star. The actor is the character that players will be portraying every single game. Their abilities and attributes will remain stable. However, the character's Role changes from one session to the next. Each session is a movie, and the Role is the actor's part in the movie. A Role can be anything from Triad Assassin to Hard-Boiled Cop to Drunken Fisherman. Each Role has unique abilities that stack on top of your actor's for that specific session. Another interesting quirk of the game is Stunts.

During combat, players are encouraged to have their characters do the wild and death-defying stunts of Hong Kong cinema. The wilder and more dangerous the stunt, the better the reward. Characters are rewarded by the gamemaster with Star Power points which represent the Actor's pull in the cinema world and his or her popularity with the audience. These can be cashed in for rerolls and other goodies such as script rewrites (e.g. the villain happens to be standing next to barrels of flammable liquid). The game also contains a lot of "real-world" information on Hong Kong and the history of Hong Kong cinema that some might find interesting and others might find to be a waste of space in a roleplaying game book. The game is great. With an energetic group with a feel for the Hong Kong action genre, you can make movies to rival Hong Kong blockbusters. In some respects, I feel that HKAT lumps too many of the genres together with no demarcation between gun fu, kung fu, and wire fu films, and so they all get smushed together. In general, it's fun, original, creative game and a worthy second edition to the original by Gareth Michael-Skarka. Gameplay is episodic, with each game session being a "movie" independent of other game sessions. The movies can cover any of the traditional Hong Kong action film genres.
