Minesoils from 1 to 50 years old in southeastern Montana were compared to adjacent natural soils. Due to their maninfluenced origin, minesoils had several unique morphological properties which made them difficult to classify. Weakly consolidated rock fragments, common in minesoils, acted in part like soil in supplying water and in part like rock in preventing root penetration. ## REVIEW OF SOIL MORPHOLOGY GENESIS AND CLASSIFICATION

- Main characters:Joni Evans and her four year old son Brady.Sam Crawford.Joni & Brady move from Chicago to Saddle (cute name), Wyoming.Brady decides to ask Santa for a daddy.If I remember correctly Sam was the Santa. He feels that the least he can do is find Brady's mother a man.There is always tension when a man decides that a woman needs a man around.This is a good book. However, IF it sounds familiar that is because this was previously released in 1995. This is not a new book.The previous edition Cowboy Santa (Christmas Is For Kids) (Harlequin American Romances, 755)

- I loved reading this book. I couldn't put it down. The relationships and feelings of the characters really makes you feel for them as you try to place yourself in their shoes. Mariah is such a loving, hurt person and all you want is to do is ug her and love her. I was really moved by this book. It made me think more about the impact of my life and love on others.
