REVIEW OF HEAD FIRST SERVLETS AND JSP PASSING THE SUN CERTIFIED WEB COMPONENT DEVELOPER EXAM

- While in the main I loved this book, Abbey's hypocritical nature had me fuming at times. He makes fun of tourists for scratching their names in sandstone (rightfully), but then goes ahead and carves his name in trees. He makes fun of tourists for littering (rightfully), and a few chapters later describes rolling a tire into the Grand Canyon (nearly missing a mule train!). The book is riddled with other such examples. The thing is: I'm not sure he even recognized these glaring contradictions. But aside from not really liking HIM, I loved the BOOK... the last chapter left me weeping...

- If I were stranded on a deserted island and could have one book with me, I would choose this one. It angers me, saddens me, offends me, and elates me. But most of all it inspires me. Each time I read it I uncover something precious and unique. It never grows old. If you truly love all that is convenient and commercialized, if you revel in the gifts technology brings you, don't read it. It's too good for you. If you truly love and are capable of appreciating the serene beauty of the wilderness buy it, read it, then cry. For it's all gone. When you read, read beneath the text. Read deeply into the subtext of this book. It's all about surfaces. Abbey proves that we cannot truly see, experience or appreciate anything unless we can look below the surface as he did.
