Keep in mind, reading evaluations can aid you make informed choices regarding what to read next and can expose you to new writers and genres you could not have actually taken into consideration before.

### **REVIEW OF AN INTRODUCTION TO APPLIED BIOGEOGRAPHY**

- THE BEAN TREES is a novel about a young woman, Taylor Greer, who leaves her home state of Kentucky to find a life outside of what she knew - growing up to become barefoot and pregnant. She wanted more than that, but she did not really know what she wanted. She finally arrives in Tucson and meets a woman who wants to give Taylor a 3 year old child. Taylor promises to take care of the little girl. Whether the woman is the child's mother, we never do find out. But Taylor does find out right away that something is not right with the child. Turtle, the

name Taylor gives the child, does not talk. Taylor also finds bruises over the child's body while giving her a bath. Maybe Taylor has saved this child from a horrible life, but now she is responsible for the welfare of this little Indian American girl. But now what to do? No money and no job, and she's got a kid she never planned on having. Taylor and Turtle end up in a small town in Arizona and after meeting several nice people who help them out, they end up living with a gal named Lou Ann, who has her own story to tell. The book is intertwined with the stories of both women so we get to know them both very well. Along the way they meet and get involved with a Hispanic couple, Estevan and Esperanza. They are from central America, and their story is a mystery, except we know Esperanza knows very little English, and Estevan was an English teacher in his home land. The four of them, along with little Turtle, become good friends, and soon Turtle is responding to the love she is getting from her new family. But there is still the mystery of what really happened to little Turtle.... THE BEAN TREES is the 2nd Barbara Kingsolver novel I have read, THE POISONWOOD BIBLE being the other one. This second novel reads quite differently than POISONWOOD BIBLE did, and I guess one reason is that THE BEAN TREES was written over a decade before. Ms. Kingsolver's skills as a story teller greatly improved between these two novels, but that does not mean THE BEAN TREES is a poorly written book. On the contrary, I found it very well written and enjoyable to read. The feel of both books is very different. While POISONWOOD had the feel of an epic, THE BEAN TREES was a much more simpler novel (being a much shorter novel helped!) I can't say whether one book was better than the other. I liked both equally. What I'm

finding I really like about Ms Kingsolver's books is that she is very good at character development. She knows how to paint a character well enough that I was able to picture right away what these characters were all about. They were not shallow one dimensional people, but people I could care about. Obviously, I am giving THE BEAN TREES a glowing recommendation. It was probably one of the better books I read in 2001.

- this is one of the best books i've ever read. barbra kingsolver is now one of my favorite authors. it's about a woman named taylor

greer. she grows up in rural kentucky and gets out of there as soon as she can. she is a spirited unique kind of person. she heads out west, and on the way acquires a 3yr. old american indian girl. she, now being a parent has to find work and such. she get a room mate lou ann. they become good friends. taylor works for mattie who sell tires and takes in illegal immigrants in. a couple from guatamala staying with mattie become good friends with taylor and they share an unforgettable journey. i couldn't put it down.
