Reading Philo
Cambridge University Press

A contemporary of both Jesus and the apostle Paul, Philo was a prolific Jewish theologian, philosopher, and politician -- a fascinating, somewhat enigmatic figure -- who lived his entire life in Alexandria, Egypt. His many books are important sources for our understanding of ancient Judaism, early Christianity, and the philosophical currents of that time. Reading Philo is an excellent introductory guide to Philo's work and significance. The contributors -- all well-known experts on Philo of Alexandria -- discuss Philo in context, offer methodological considerations (how

best to study Philo), and explore Philo's ongoing relevance and value (why reading him is important). This practical volume will be an indispensable resource for anyone delving into Philo and his world.

Philo of Alexandria

A lot of mystery surrounds the book of Hebrews, especially regarding its authorship, date, and audience. But by asking the right kind of questions, one can move beyond the impasses typical of historical investigation. In this volume, David deSilva explores Hebrews through a social-scientific lens, asking one of the most important questions when interpreting letters and sermons: What was going on in

the community to occasion such a response? DeSilva looks for clues concerning the anonymous author, his education level, the influence of the Greek environment, and his perception of his own authority. In addition, by forming a social profile of the audience that includes location, ethnicity, and class status, deSilva brings to light the author's aims of helping protect Christian converts from persecution and social shame. This book not only helps the sermon "to the Hebrews" take on flesh and blood for contemporary readers; it also expands the readers' tools for asking fresh questions and exploring new dimensions in biblical texts.

The Works of Philo

Oxford University Press

The author of Hebrews is arguing that God himself has brought about the fulfillment of these institutions through his Son's priesthood, his once-for-all sacrifice, and the new covenant he inaugurated in the last days. These new institutions are never denied the Jews. In fact, the context of the epistle presumes that these are primarily for the Jews, considering that the author was speaking to a Jewish-Christian community. The author is not

arguing for the abandonment by God of the Jewish people, but rather for the abandonment of the shadowy means by which God's people drew near to him. It is here we can speak of a qualified

supersessionism. According to the author of Hebrews, the Levitical priesthood, the Mosaic covenant, and the Levitical sacrifices have been superseded by Jesus' priesthood, the new covenant, and Jesus' once-for-all sacrifice. However, we conclude that the polemical passages in Hebrews do not promote hatred of the Jews, nor do they advocate the destruction of the Jewish people. Rather, the author of Hebrews stresses the fulfillment of specific Jewish

institutions for the benefit of the Jews. It is this idea of fulfillment that rules out the charge that the epistle promotes the supercession of the Jewish people. Because of God's great love for his people, he has provided a superior way by which his people can draw near to him. --from the Conclusion

REVIEW OF PHILO AND THE EPISTLE TO THE HEBREWS

- The late, great, Frank Herber's "Dune" is a classic in the true sense of the word. I've read many wonderful novels (2001, Stranger in a Strange Land, Foundation, Hyperion, Ender's Game, etc,

etc.--classics all) that will stay with me for life, but none `wormed' its way in so deeply as "Dune". Herbert's masterpiece works on so many different levels, it would take another novel just to describe the depth. I won't lie to anyone, when I first picked up this novel many, many years ago and took a look at the dictionary, I began to wonder what I got myself into. This isn't a `light' read. However, Herbert hooked me on the first page and never let go. For me personally, this novel had everything a great classic should have, including stunningly rich, vibrant characters (something most sci-fi novels grievously lack). Granted, there are many that may not like this novel as much as I

do, but I believe "Dune" is the standard by which all science fiction novels should be judged, and the goal all authors should try to attain--a quite daunting task, I might add. After many years (and a few failed attempts), "Dune" was made into a movie. Now I know that most people didn't like the movie (me included), but let's be fair. How does anyone make a successful movie of a novel that has so many intricate layers? While I thought the casting was first-rate and the costumes authentic, the task before them was monumental (and, alas, the special effects were `cheesy' at best).

The movie tried desperately to be true to Herbert's vision, but it just cannot be done, and probably should never have been attempted. Between 1 and 10, "Dune" gets a solid 10. This is the only 10 I have given any novel, because no novel I have yet read matches the artistic depth and richness of Frank Herbert's "Dune".

- This is a GREAT book. It is probably the best book I have ever read. Lord of The Rings is the only other book that I have read that compares to it. It is a must read to any person who likes science fiction books.
