REVIEW OF INTRODUCTION TO REAL ANALYSIS JIRI LEBL SOLUTIONS

- Meg knew she would be in for a busy and trying weekend when she agreed to accompany her boyfriend Michael to a fan convention for Porfiria, Queen of the Jungle. Trying because Michael was the breakout romantic star of the cheesy scifi tv show and most of his fanbase wished Meg would disappear. Busy because Meg had a booth at the accompanying craft fair to sell her handcrafted ironwork, including swords and daggers featured on the show. What she didn't realize that the situation would be made even busier and more trying by the release of monkeys and parrots by overzealous fans who were trying to turn the generic chain hotel/convention center into a more realistic jungle setting and the murder of the show's temperamental owner/star. Once again Meg, in her neverending quest to impose order on the chaos that seems to follow her and her quirky family finds herself on the trail of a murderer. This is the fifth in the Meg Langslow series of comic cozy mysteries featuring ornamental blacksmith Meg, her actor/professor boyfriend Michael and their eccentric extended family. All of the series, which began with MURDER WITH PEACOCKS, have some sort of bird tie-in in the titles, characters that appear in the farcical stories to some degree. This series manages to find a good balance between the cozy (the charming cast of recurring characters), comic (the situations that Meg and her family find themselves in are reminiscent of the best I Love Lucy plots) and mysteries that have at least a twist or two that will surprise the reader. The overall story arc of this series is quite pronounced so for maximum enjoyment begin at the beginning and proceed in order.

- if you like to feel depressed, then by all means read this book...it is dark and imaginary smells are those of death....yuk....totally disgusting.
