Over the past several years, STEM education research has witnessed rapid growth, attracting considerable interest among scholars and educators. In *The Story of N*, Hugh S. Gorman analyzes the notion of sustainability from a fresh perspective—the integration of human activities with the biogeochemical cycling of nitrogen—and provides a supportive alternative to studying sustainability through the lens of climate change and the cycling of carbon. It is the first book to examine the social processes by which industrial societies learned to bypass a fundamental ecological limit and, later, began addressing the resulting concerns by establishing limits of their own. The book is organized into three parts. Part I, “The Knowledge of Nature,” explores the emergence of the nitrogen cycle before humans arrived on the scene and the changes that occurred as stationary agricultural societies took root. Part II, “Learning to Bypass an Ecological Limit,” examines the role of science and market capitalism in accelerating the pace of innovation, eventually allowing humans to bypass the activity of nitrogen-fixing bacteria. Part III, “Learning to Establish Human-Defined Limits,” covers the twentieth-century response to the nitrogen-related concerns that emerged as more nitrogenous compounds flowed into the environment. A concluding chapter, “The Challenge of Sustainability,” places the entire story in the context of constructing an ecological economy in which innovations that contribute to sustainable practices are rewarded.

REVIEW OF DALE H BESTERFILED ET AL TOTAL QUALITY MANAGEMENT PEARSON EDUCATION ASIA 3RD EDITION INDIAN REPRINT 2006

- I am not Mormon but I wanted to learn as much as I could about the LDS faith in as short a period of time as possible. I read the book in two days and found the information I was looking for. It is an excellent introduction to a truly great faith. The lifestyle is too restrictive for me but I can see the benefit and reasoning behind it. My only real complaints about LDS beliefs is the church's position on breeding and tithing 10%. Over population is a serious problem and it does not help the environment for people to have

seven, eight or nine children even if they can afford it. But I really like the LDS emphasis on family and family values. I support Mitt Romney as President and will gladly argue with anyone that his faith is not a reason to vote against him. This book has given me some useful knowledge to use in support of that cause.

- Harriet Robbins Ackert has put together a magnificent first novel, that includes wonderful California horse country, just enough sex to keep one interested, interlaced with love, family, jealousy and a good dose of religion, to make for a suspenseful, fast paced, but very believable novel. It keeps you on edge and for her next novel.
