REVIEW OF HANDS ON MACHINE LEARNING WITH SCIKIT LEARN AND TENSORFLOW

- Sherman McCoy, a 39 year-old white Wall Street bond salesman, self described "Master of the Universe" lives on Park Avenue, he is married with a daughter and is a member of high society. He also has a hot chick on-the-side Maria. On their way home one Tuesday night they make a wrong turn and end up in an abandoned seedy side of the Bronx. Two black guys walking down the street offer their assistance "Hey buddy, you need some help?". Sherman and Maria sure they're being set-up, panic and end up bumping into one of them with Sherman's Mercedes and then speed away without reporting it. It all blows up when one of the black guys turns out to be severely injured and the press, police and the mayor get involved in political issues involving race and class. The writing is so great that even in 2010 a story that was written 20 years ago still seems fresh and relevant. Kudos big time!

- I just loved this book. The illustrations were bright and very eye catching. The kitten was just adorable. I liked how the kitten went to all of the different animals looking for its purr. This book would help kids learn all of the different sounds that animals make. It was a very cute book.
