## REVIEW OF 68000 MICROPROCESSOR 5TH EDITION

- This book isn't worth the paper it is written on!!!It contained nothing of substance.Where did this couple live?What were their last names?What was a day like at home for the mother(Hyacynth)?What were her children like?What was important to her?These are just a few of the subjects not even touched upon by the author.I couldn't get past the first 100 pages.I

hav not read any of this authors other books since Evergreen,which I loved.This book was a waste of my time and money.I will not ever waste anymore money on this authors books.

- Bruce Lee was an "original" no doubt..He was an innovative martial artist who created an eclectic style of Gung Fu called Jeet Kune Do, an assimilation of many fighting styles...Bruce didn't believe in systems..he always believed that if you could use something to achieve a result use it! Bruce had many followers and "famous" students..such as Steve McQueen, Kareem Abdul Jabbar, Chuck Norris, Joe Lewis, Mike Stone, James Coburn and many others...Bruce would be the first to admit that he was first and foremost a martial artist...He used the movies to bring his "art" to the masses and what an impact he made! His films today are quintessential examples of what a martial arts film should be! This book by his wife Linda Lee is a beautifully written biography that offers worlds of insight into who Bruce Lee was as a person..Linda writes lovingly of their relationship and brings a history of Bruce from a baby to his death at the too young age of 32 to you..Bruce lived his life to the fullest and was not only a great martial artist but a very profound philosopher as well...This is a wonderful book and highly recommended, not only to fans of Bruce but to anyone seeking inspiration in their lives....
