## REVIEW OF ADVANCED GAS PATH GE

- If you love the books you'll like this recording. This series is unabridged. It's something like 52 hours long for all three sets. This is what I put into my car cd player when I was trapped in rush hour traffic. It makes a good escape if you're a Tolkien fan. One reader narrates the whole book, and he does a great job of changing his voice during dialogue between characters. I've been very happy with all three of these recordings.

- Despite its staggering length and dreary descriptions of every leaf, Fellowship of the Ring has a certain fairy-tale sheen and epic sweep that make it readable for all. The Two Towers, though, is mostly for diehard Tolkien fans. The first 200 pages or so climax with a huge battle for Helm's Deep, but for most of that time we have to endure the stupefying company of the warriors of Rohan. These beefy blonde Nordic guys have NO sense of humor, and drone on endlessly about their ancestry (who CARES?) when they're not indulging in soporific courtesies. I always feel uneasy around these hulks--I expect to see swastikas appear on their shields at any moment. Tolkien was channeling the Viking types immortalized in coma-inducing epics like Beowulf and Lord are these fellows

boring! However, hobbits to the rescue! At one point we switch to Merry and Pippin, and once they appear, the story moves again and we can enjoy characters with human foibles. These two doughty halflings endure capture and torment by orcs (goblins, who are much more entertaining than the ski-instructor types) and then wander into the world of the ents. If you thought tree-hugger Tom Bombadil was weird, these creatures will get you howling with laughter. They are tree-shepherds (I'm not making this up) and they more or less look like trees, but they go around saying things like "Hm. Hroom" and drinking lots of water. Later on, they turn out to be pretty tough, bringing down a whole walled city in minutes. Treebeard is their leader and he's right out of some Saturday morning cartoon show. The second half of the book brings us back to Frodo and Sam, and their journey to Mordor. They team up with Gollum, who was much creepier in *The Hobbit*. Here, he's a whiny reptilian nuisance and we must conclude that Frodo is an idiot for trusting him since anyone can tell

he's up to no good. When he sells out his companions to a gigantic spider, we're not surprised. Tolkien manages some wonderful descriptions in this part, of the suffocating, foggy, wet, evil weather in Mordor (sounds like Long Island in the summer). The spider Shelob is a hoot, a creature who needed to wait for computer generated graphics. Again, most of the text is filled with dreary step by step schlepping from place to place, with tedious descriptions of EVERYTHING. There are superb moments (the orcs boiling out of their hiding places like swarms of ants, the disgusting marshes) and as anyone with half a brain knew, Gandalf returns (and he is the BEST character of all). The scene where Gandalf humiliates the evil wizard Saruman is worth the price of admission. And the slinking, cowardly Wormtongue is a great creation--if Tolkien hadn't written this in the 1940's, I'd swear he was based on Henry Kissinger. So enter at your own risk. Some exciting scenes, lots of sludge, basically a bridge from *Fellowship of the Ring* to *The Return of the King*. Not for anyone with arachnophobia.
