An entertaining and informative introduction to how ancient Egyptians practiced magic in their daily lives. In the ancient world, if you needed a love charm, wanted to contact your dead wife, or needed the ability to fly like a bird, the magicians of Egypt were the ones who could make it happen. In *Ancient Egyptian Magic*, Christina Riggs explores how the Egyptians thought about magic, who performed it and why, and also helps readers understand why we've come to think of ancient Egypt in such a mystical way. Readers

will learn how to cure scorpion bites, discover why you might want to break the legs off your stuffed hippopotamus toy, and uncover whether mummies really can come back to life. Readers can also learn how to save a fortune on pregnancy tests—urinating on barley grains will answer that question—as well as how to use the next street parade to predict the future or ensure that an annoying neighbor gets his comeuppance. Was magic harmless fun, heartfelt hope, or something darker? Featuring demons, dream interpreters, the *Book of the Dead*, and illustrations from tomb paintings and papyrus scrolls, Riggs breathes new life into ancient magic and uses early texts and images to

illuminate the distinctions between magic, religion, and medicine.

In this introduction, Jaromir Malek, an internationally respected authority, deftly traces Egyptian art from its prehistoric origins through 3000 years of astonishing achievements in the era of the pharaohs to the conquest of Egypt by the Romans. He outlines artistic trends in each period, linking them to economic, political and spiritual developments, and discusses the full range of artistic output: monumental architecture, sculpture, wall-reliefs and paintings, furniture, jewellery, papyri and pottery. He concludes with a fascinating

account of Egypt's influence on modern art. Illustrations document the immense variety and superb quality of the art and architecture of one of the world's great civilizations.

Having the opportunity to teach math for over 25 years, I have found many days when you hit a brick wall. Whether it was in middle school, junior or senior high school, or at the community

college, there were days when the new topic was not understood by the students. I could see it in their reaction (faces) to my explanation. Sometimes, I was the culprit. Knowing full well that the homework is a review of that day's topic, it must be delayed. As an educator teaching math, the crescendo of each day builds, as we go further into the school calendar. Someone, who missed out and could not grasp the idea, needed to be tutored. That luxury is not available. FRUSTRATIONS TEACHING MATH, gives the student an opportunity to see how basic math ideas are solved. Sometimes, I give two scenarios in solving a problem. Other times, a

"cheating way" is shown, so that math can be understood and also be fun. Some of the topics covered are the various ways to factor a binomial, trinomial, or polynomial. Another favorite is grasping the concept of greatest common factor or least common multiple. Right triangle trigonometry for the middle school student is explained using boating as the source of frustration. How much to tip at a restaurant? What does a half-off sale really mean? Let us not forget the "story" or word problems that really cause concerns. Distance! Rate! Time! All these ideas plus games and many more mathematical topics are reviewed on my 45 day road trip from

Delaware to Florida. Coming back, with several stops on the way home, we'll explore these "frustrations".

Real understanding of past societies is not possible without including children, and yet they have been strangely invisible in the archaeological record. Compelling explanation about past societies cannot be achieved without including and

investigating children and childhood. However marginal the traces of children's bodies and bricolage may seem compared to adults, archaeological evidence of children and childhood can be found in the most astonishing places and spaces. The archaeology of childhood is one of the most exciting and challenging areas for new discovery about past societies. Children are part of every human society, but childhood is a cultural construct. Each society develops its own idea about what a childhood should be, what children can or should do, and how they are trained to take their place in the world. Children also play a part in creating the

archaeological record itself. In this volume, experts from around the world ask questions about childhood - thresholds of age and growth, childhood in the material culture, the death of children, and the intersection of the childhood and the social, economic, religious, and political worlds of societies in the past.

The Middle Kingdom (ca. 2030–1650 B.C.) was a transformational period in ancient

Egypt, during which older artistic conventions, cultural principles, religious beliefs, and political systems were revived and reimagined. Ancient Egypt Transformed presents a comprehensive picture of the art of the Middle Kingdom, arguably the least known of Egypt's three kingdoms and yet one that saw the creation of powerful, compelling works rendered with great subtlety and sensitivity. The book brings together nearly 300 diverse works—including sculpture, relief decoration, stelae, jewelry, coffins, funerary objects, and personal possessions from the world's leading collections of Egyptian art. Essays on architecture, statuary, tomb and temple relief

decoration, and stele explore how Middle Kingdom artists adapted forms and iconography of the Old Kingdom, using existing conventions to create strikingly original works. Twelve lavishly illustrated chapters, each with a scholarly essay and entries on related objects, begin with discussions of the distinctive art that arose in the south during the early Middle Kingdom, the artistic developments that followed the return to Egypt's traditional capital in the north, and the renewed construction of pyramid complexes. Thematic chapters devoted to the pharaoh, royal women, the court, and the vital role of family art created for different

strata of Egyptian society, while others provide insight into Egypt's expanding relations with foreign lands and the themes of Middle Kingdom literature. The era's religious beliefs and practices, such as the pilgrimage to Abydos, are revealed through magnificent objects created for tombs, chapels, and temples. Finally, the book discusses Middle Kingdom archaeological sites, including excavations undertaken by the Metropolitan Museum over a number of decades. Written by an international team of respected Egyptologists and Middle Kingdom specialists, the text provides recent scholarship and fresh insights, making the

book an authoritative resource.

An insightful volume delving into the enduringly compelling art of ancient Egypt, from a new historical perspective The art and architecture of Egypt during the age of the pharaohs continue to capture the imagination of the modern world. Among the great creative achievements of ancient Egypt are a set of constant forms: archetypes in art and architecture in which the origins of concepts such as authority, divinity, beauty, and meaning are readily discernible. Whether adapted to fine, delicate jewelry or colossal statues, these forms maintain a human face—with human ideas and

emotions. These artistic templates, and the ideas they articulated, were refined and reinvented through dozens of centuries, until scenes first created for the earliest kings, around 3000 BCE, were eventually used to represent Roman emperors and the last officials of pre-Christian Egypt. Bill Manley's account of the art of ancient Egypt draws on the finest works through more than 3,000 years and places celebrated masterpieces, from the Narmer palette to Tutankhamun's gold mask, in their original contexts in the tombs, temples, and palaces of the pharaohs and their citizens.

REVIEW OF ANCIENT EGYPTIAN ART

- This is a story that must be read to be truly appreciated. Set at a time of political turmoil in France, with Napoleon in exile, Edmond Dantes is an ambitious young sailor with prospects, and a beautiful fiancée,

Mercedes. Three people conspire against him to ruin his life, one wants his girl, another his position. He is banished to the notorious Chateau d'If, and is believed by his friends to be dead. In prison he meets the Abbe Faria, who becomes his teacher, and together they plan to escape. Edmond escapes with a treasure map 14 years later, claims the fortune, and becomes the mysterious Count of Monte Cristo, bent on getting revenge against those who wronged him. With his new found fortune he effortlessly penetrates the highest levels of society, and unrecognisable to his enemies, he now befriends them. The revenge comes slow and sweet, as he plots the downfall of his enemies. He is ruthless, deliberate and unrelenting, and appears to know everyone's dark secrets, although we don't always know how he knows. There are many sub characters and subplots that are not in the movie versions of the story. There are some genuinely good characters whose path to love is blocked, and he is in the background pulling the strings to work the situation for those he loves. He is also pulling the strings on those he is out to get. He refers to himself as providence, as he takes the archetype role of flawed hero avenger, and wreaks his awful vengeance. He mysteriously appears everywhere, and knows everything,

and uses it. He is karma incarnate. The society and manners of the time are brilliantly evoked by the beautiful writing of Alexandre Dumas. As the words leap from the page into your imagination, you see the characters, you hear their words, and feel their emotions. Most of all, you feel for Edmond Dantes. Will revenge bring him some measure of satisfaction, and make him happy? Or, will he be forever unable to forgive, and be happy. In some respects his life is our life, as you hope for some measure of transformation in his experience that you can apply to your own. Will he reunite with his beautiful fiancée, now married to

one of his enemies? Can he get revenge, and be forgiven by her? This is a story to be savored. So, go for the unabridged version. If you have seen the original movie with Robert Donat, and the more recent one with Jim Caviezel, who subsequently went on to play the contrasting role of Jesus Christ, I love both of the movie versions. There is way more in the book than can be conveyed in a two hour movie, and so the story is condensed and some of the characters altered to make the story more movie friendly. So, if you are like me, and enjoyed the movie, you will love the book.

- This might be my favorite book of all time. One confession I have is that I had to read it a second time

to fully appreciate some of the subtle nuances of the story. The first time I listened to the book I sometimes got confused about who was who. John Lee did an amazing job at narration. In no way did his reading get in the way of the story. For those that have not read classical literature from this time period you are in for a treat. The dialogue is AMAZING. I am convinced that we have forgotten how to fully use spoken words in our everyday communication. Alexandre Dumas is a master of communication and I found myself thinking that I must remember some phrase or other that he uses. The story is no less captivating. The intricate web of diverging and converging plot lines kept me fully engaged as Dantes fortunes rose, fell, and rose again. For those that have not read The Count of Monte Cristo and are not afraid of a longer book you are in for a treat. I hope you enjoy it as much as I did.
