Macroeconomic theories were designed to cope up with the economic turmoil, such as Great Depression, so as to stabilize the economy. This book comprehensively explains the broad aggregates and their interactions such as national income and output, the unemployment rate, and price inflation, and sub-aggregates like total consumption and investment spending, and their components. Divided into six parts, the textbook elaborates various aspects of macroeconomics—circular flow and its effects on national income, monetary theory, business cycle theory and macroeconomic policies—in detail. The book makes clear the difference between three approaches to economics—Keynesian economics, which focuses on demand; New-classical economics, which is based on rational expectations and efficient markets; and Innovation economics, which is focused on long run growth through innovation. A prominent feature of this text is the use of simple algebraic expressions and formulations to reinforce analytical expositions of complex macroeconomic theories in students. The book also explicates how macroeconomic models and their forecasts can be utilized by both governments and large corporations to assist in the development and evaluation of economic policy. The chapters are incorporated with real-life examples giving practical insight on the subject. Primarily intended for the undergraduate and postgraduate students of economics, this book can also be beneficial for the students opting for the courses in commerce.

Air bags cause accidents, because well-protected drivers take more risks. This well-documented truth comes as a surprise to most people, but not to economists, who have learned to take seriously the proposition that people respond to incentives. In *The Armchair Economist*, Steven E. Landsburg shows how the laws of economics reveal themselves in everyday experience and illuminate the entire range of human behavior. Why does popcorn cost so much at the cinema? The 'obvious' answer is that the owner has a monopoly, but if that were the whole story, there would also be a monopoly price to use the toilet. When a sudden frost destroys much of the Florida orange crop and prices skyrocket, journalists point to the 'obvious' exercise of monopoly power. Economists see just the opposite: If growers had monopoly power, they'd have raised prices before the frost. Why don't concert promoters raise ticket prices even when they are sure they will sell out months in advance? Why are some goods sold at auction and others at pre-announced prices? Why do boxes at the football sell out before the standard seats do? Why are bank buildings fancier than supermarkets? Why do corporations confer huge pensions on failed executives? Why don't firms require workers to buy their jobs? Landsburg explains why the obvious answers are wrong, reveals better answers, and illuminates the fundamental laws of human behavior along the way. This is a book of surprises: a guided tour of the familiar, filtered through a decidedly unfamiliar lens. This is economics for the sheer intellectual joy of it.

Two crimes of passion separated by 140 years, but bound by strange similarities. She married the soldier who had kidnapped her during the 1857 massacres, and went on to live, seemingly happily, as a Muslim. When Pia stumbles upon Margaret's private journal and letters, she finally begins to understand how it might have been possible for her to fall in love with her captor. But the more compelling question before Pia is whether her sister might have been similarly in love. Why else did she not return home when she clearly had the chance? But, if she had been in love, why was she eventually killed? Moving gracefully between the gruelling summer of 1850s' Kanpur and the leaden grey winter of modern-day Delhi, Jaishree Misra weaves an intriguing tale of danger and violence and the human capacity for hope.

This book is a collection of articles published by the author over a period of time. Much of his writing reflects the social, political and economic issues that have emerged over the years and impacted India's politics and governance. Given his special interest in the working of the constitution, and the march of democracy since independence, the book contains chapters which specifically deal with constitutional issues, the working of parliament, the system of justice, the executive and the media. The author feels that negating the facts of history has been a major pastime of the Nehruvian and Marxist schools and that the distortions introduced by these schools need to be challenged and corrected in the current phase of national politics. This is reflected in his articles which deal with the running secular versus pseudo-secular debate as also the political battles being fought on what is 'national' and what is 'anti-national'. In any case, whatever the issue and however intense the debate, he is firmly of the view that it must all happen within the parameters of the constitution.

## REVIEW OF MISRA PURI LATEST EDITION

- This book should be required reading for every high school history class. The sacrifices of those who fought in WWII should NEVER BE FORGOTTEN. Several chapters will give you a lump in the throat, if not tears in your eyes. However on page 139, Mr. Brokaw refers to General George S. Patton's IVORY HANDLED pistols as Pearl Handled. General Patton corrected a journalist on this subject by saying "Only a pimp in a New Orleans whorehouse would have a pearl handled pistol."

- Brokaw's "greatest generation" thesis is dubious and presumptuous. Some facts: In the years leading up to WWII, the US was fiercely isolationist. The "greatest generation" was not interested in defeating fascism/nazism/totalitarianism until Pearl Harbor-- despite the fact that the war had been raging for more than 2 years in Europe. (There is mounting evidence that FDR orchestrated the Pearl Harbor debacle in order to rally a disinterested and apathetic public to the cause of war. FDR's next step was to violate the civil rights of Japanese-American citizens, intern them in "relocation" camps, and then have the arrogance to draft them into the war!) Whether we want to admit it or not, US military involvement in Europe was essentially a mopping up of a crumbling alliance of Fascist/Nazi troops whose best and brightest had perished at the hands of the relentless Soviet juggernaut. While US troops had to deal with Hitler's last offensive in the Battle of the Bulge, they were spared the mega-blitzkrieg assaults of Moscow, Stalingrad, and Kursk (the largest tank battle in history), in which the Soviets stood up to Hitler single handed, and defeated the dictator to win back their country (Soviet casualties in WWII are estimated to be 20 MILLION). One of the primary reasons that US-Soviet relations turned cold after the war was Stalin's justified belief that the US dragged its feet in opening a second front. The next gesture of arrogance and cruelty of this "greatest generation" was the decision to drop not one but two atomic bombs on mainland Japan, ostensibly to end the war, but in reality to demonstrate our military superiority to the Soviets-- a rather macabre and cynical gesture to our then-ally. Following the war, the "greatest generation" came back home and raised a "lesser" generation of kids who recognized the hypocrisy and shallowness of their parents' attitudes (racism, conformity, hyper-patriotism) and deeds (McCarthyism, Korea, Vietnam, and ultimately Watergate). Some more facts: I am neither Democrat nor Republican. I have sincere respect and admiration for the US soldiers who sacrificed in ALL wars, not just WWII. Those who fought in WWII deserve praise. However, ALL generations of Americans have contributed to the fabric of the United States and deserve praise as well. Why do we need to define who was "the greatest"?
