REVIEW OF 4EFE ENGINE OIL

- I was blown away by this book, couldn't put it down. The similarities with today are a bit scary. It's a great horror without the horror, if you know what I mean.

- To some up this book, it is a novel written about the future (1984) written in 1949. It is based on a fictional new world order that arose from the history of the world and especially world war I & II. It is a deep look into what could happen if government gains too much control of our everyday lives. The suprising thing is that you can draw parrallels with many of the features of our modern lives. If youve heard the terms "big brother" and "thought police", this is where they came from. I recommend this one it'll make you think twice about our lives of emails, cameras, political correctness...etc.
