REVIEW OF BIG NATE ON A ROLL

- well, I think this is a good book, but I think it is a little slow. It is about a woman who dreams about being a "lady" like her Grandmother, but instead goes with her husband out west to be a farmers wife. her kids all leave her when they are old enough, and it seems like they don't care about her at all. when she gets older, they all tell her she needs to move away from the big house she has lived in since she was 20 after her husband is dead, and don't even listen to what she wants. I like books about loving Family's, not family's who don't care about eachother, or don't show it. but, the story is okay. so I give this book 3 stars.
- Robert C. neville explores the metaphysical foundations of modern scientific concepts in a tradition that goes back to the great writings of continental philosophy such as Hegel, Husserl and Bergson. But, being an American in the end of the twentieth century, Neville uses the process philosophy of Alfred North Whitehead and the metaphysical concepts of the ontology of Martin Heidegger, together with contemporary quantum physics theory and the big-bang theory, to give us an holistic account of the concept of time as examined through the context of Eternity, that is complimentary to Christianity thought, Buddhizm and Zen. No other book that I have read deals with such a deep philosophical question concerning

time in such a broad context. You can never tell if neville is more faitefull to modern science, continental philosophy, religion or eastern thought. Neville is a modern theologian, a brilliant scholar, that does not forget modern science, and treat it with due respect, like he treats continental philosophy and metaphysics. Although he deals with religion, metaphysics, moral philosophy, philosophy of science, physics and zen philosophy, Neville never fails the temptation to write in a popular way or in indoctrinal voice. He truly take the imposible task to write a complete metaphysic of time and Eternity, in the same context that Hegel judged Descartes, Spinoza, Liebnitz, Lock, Berckly and Hume to have their own metaphysics. Because Neville's book borrows from three main systems, that is from Bergson, Whitehead and Heidegger, and synthesise them together in order to find the answer to the question of time as this concept is used in physics, western culture, Budhism, Judaism and Christianity, it is not too exaggerated to claim that it is an original thought that have its place as one of western culture keystones - but still, only intellectually, since this book is very rarly known in philosophical circles and university departments. The only flaw of this book is the trust that Neville feels (to my mind) towards the western modern sciences of astronomy, chemistry, physics and astrophysics. It seems to me that in bringing science into philosophy Neville have made this book a waste in a hundred years from now: it will be old instead of immortal. As science change, it will make this book redundant. For now, this book have a superb analysis of self-will and self-responsibility, that is based on its excellent understanding of the meaning of time (and subjective time) as related to the concept of Eternity.
