REVIEW OF ECONOMIC ASPECTS OF GLOBALIZATION UNIVERSITY OF NI

- This is one of my all-time favorite novels. I really like this book

because of its descriptive ideas and interesting plot. Captain Nemo IS the best villian ever created. He draws you into the story by his intellect, then slams the door in your face with is rediculous temper. The many trips taken by the characters are a vivid trip through the underwater heavens below us. READ THIS BOOK!

- Having seen the movie a couple times this was the first time I read the book and was surprised to see a significant number of unexpected

differences. Jules Verne's Twenty Thousand Leagues Under the Sea is arguably the first technical thriller, launching a genre which has since grown wildly in popularity and

includes most of Michael Chricton's work. It is a very imaginative book, the story of the mysterious Captain Nemo - haunted by an implied but never explained past - who has built for himself and his crew the submarine Nautilus to be free of the laws of man and to live successfully and sustainably on the bounty of the world's oceans, which he intrepidly explores in all its wonders. Inevitably he is chased by the main characters, Ned the Harpooner, Mr. Arronax the professor and Conseil his man-servant, in the frigate USS Abraham Lincoln. Unlike the movie the story is told entirely by Mr. Arronax and Ned is more a minor character, and a stolid Canadian as opposed to the boisterous and fun loving American in the movie. Also unlike the movie the Nautilus does not sink the Lincoln, but in a duel vents it with steam that throws our three main characters overboard whom are then rescued after the Lincoln, ignorant to the fact they are no longer onboard, retreats from the scene. Thus begins a promising story of mystery and adventure, the possible drama of Captain Nemo being chased by worldly forces in his incredible Nautilus, the tension between the captives who are experiencing the amazing wonders of the ocean depths firsthand and their captor who cannot ever let them go without losing his own

freedom, and the chance for exciting adventures. While all of these things are delivered in the book, they are done so very anachronistically (obviously), with the drama, tension and adventure being there - and being very creatively crafted - but also being very subdued and literally drowned in an ocean of Mr. Arronax describing the latin names of the sea life he sees outside the Nautilus's window. This captures the fascination of the age with Natural History versus today's focus on excitement and adventure in these types of novels. There are many times where the book gets very, very dry as the author rattles off names that you have no idea what they refer to, and even if you google them the only hits you will get are the passages in the book itself! Based on this, the fact that this translation cuts out some 20% of the book is probably not a bad thing. Nonetheless there are some great moments of natural beauty and adventure. Jules Verne showed some incredible predictive power in describing the structural design, diving operations and maneuverability, and life support systems of a submarine, being basically spot on before anything beyond the Turtle of Revolutionary War heritage had ever been put to sea. The myriad undersea "terrains" the characters experience are particularly cool and fun. Relative to the movie the giant squid

attack is and inconclusively, underwhelming, but a feeling like a great set up for a story that ends much better scene that up for a story that ends never made it to the as more travel log than film is one where after character story or discovering the south adventure yarn. pole (something Verne Nonetheless the book got wrong obviously) is short and relatively the Nautilus is caught easy to read despite in between two it's older grammatical icebergs and must dig style which can sound itself out before its air very strange today. But supply runs out. The job the publisher did there are some however is spotty. The drawbacks too. There cover design of the are some shockingly book is very well done, dark moments for a but the editing is poor book aimed towards with many glaring younger men from the typos throughout the 1860's which seem to text. All in all the movie imply they are leading is much better as a somewhere and could movie than a direct have been great plot adaptation of the book tension builders, but would have been, with they are never fully Ned Land turned into a fleshed out, and a main character that an neither is the character American audience can they are supposed to connect with (unlike be windows into, the the highly intellectual reclusive, tortured yet and uninspiring Mr. brilliant Captain Nemo. Arronax as main The book ends quickly character of the book

or the turgid Canadian version of Ned Land), Captain Nemo is more explained as a character and pitted more against Mr. Arronax as two opposing sides of a moral coin, and the movie has a more solid story and conclusion. But the book has its own advantages and overall is worth reading, especially for its historical significance.
