REVIEW OF MAZAK T2 PARAMETER

- We was written before 1984 and Brave New World, and yet I never heard of it until coming across it on a store shelf! It's a haunting scifi story and too good not to tell others about. It is also similar in some ways to The Giver. Written in the form of the journals of a tormented genius, D-503 lives in a world so bizarre that it almost seems like he is inside a computer. Each "number" is almost identical, and most are expendable, but he is the builder of a great starship, therefore of importance to the One State, and so is granted more tolerance when his behavior gets eccentric. Life is totally regimented except for 2 personal hours each day, and even then, most

numbers either go for a walk or get a coupon allowing them to have sex with a partner they have registered with. D-503 has one male friend, a Black poet who writes for the State, and a female partner who he shares with his friend. Like all oppressive states, this one has an underground, and D-503's life falls into disarray when he meets and falls in love with I-330, a mysterious woman of the resistance. There is little in this world that stands out, but the author focuses on facial features and body shapes that attract and repel him at the same time. His mind whirling in confusion, he goes to a doctor who says he is sick because he has developed a soul, and that the condition is "incurable." Yet he is given permission to be sick because he is so important. As the time for the ship's

launch is at hand, to spread "perfect happiness" throughout the universe, the resistance bubbles to the surface, and the state devises a ghastly cure for imagination, the last shred of humanity that is left. Society explodes in chaos as numbers refuse to submit to the Great Operation that will take away their imagination, their resistance, and with it, their soul. To tell any more would ruin the story. A word of warning: DON'T read the introduction before the story, it tells how the story ends!

- The Daughter of Time is an historical mystery structured as an investigation by a bored and bed-bound detective, contemplating a portrait of Richard III. The title of this book is itself something of a mystery - who is the daughter? The mystery revolves around

Richard III, his brother Edward IV, his cousin Henry VII, and the nephews Richard was blamed for murdering. The story is told in the male voices of detective Alan Grant and his research assistant Brent Carradine. Josephine Tey opens her book with a proverb attributed to Aulus Gellius: "truth is the daughter of time." So the title is ostensibly nothing but an irrelevant personification. But reader will notice that much of the story development relies on snippets from "The Rose of Raby," a fictional biography of Cicely Neville, the mother of Edward IV and Richard III. "The Rose of Raby" is Ms. Tey's own invention. It is tempting to suppose that her original intention was to write a romantic history of a woman who raised both the best and worst of

Kings (Edward vs. Richard). This intention would have been sidetracked when her research proved that the popularized villainy of Richard was nothing but the well-publicized slander of Henry Tudor. I note that in 2002 C. L. Grace published a derivative detective story titled "La Rose de Raby." Nevertheless, the story is compelling even for the modern reader who expects a more naturalistic treatment of history and the American reader who has no natural respect for royalty. And the title of this review? The cover illustration on my copy of this book is appropriately a mirror image of the National Gallery portrait that is the subject of the story.
