[Elementary Geography](#) Pearson

This little book is confined to very simple "reading lessons upon the Form and Motions of the Earth, the Points of the Compass, the Meaning of a Map: Definitions." The shape and motions of the earth are fundamental ideas—however difficult to grasp. Geography should be learned chiefly from maps, and the child should begin the study by learning "the meaning of map," and how to use it. These subjects are well fitted to form an attractive introduction to the study of Geography: some of them should awaken the delightful interest which attaches in a child's mind to that which is wonderful—incomprehensible. The Map lessons should lead to mechanical efforts, equally delightful. It is only when presented to the child for the first time in the form of stale knowledge and foregone conclusions that the facts taught in these lessons appear dry and repulsive to him. An effort is made in the following pages to treat the subject with the sort of sympathetic interest and freshness which attracts children to a new study. A short summary of the chief points in each reading lesson is given in the form of questions and answers. Easy verses, illustrative of the various subjects, are introduced, in order that the children may connect pleasant poetic fancies with the phenomena upon which "Geography" so much depends. It is hoped that these reading lessons may afford intelligent teaching, even in the hands of a young teacher. The first ideas of Geography—the lessons on "Place"—which should make the child observant of local geography, of the features of his own neighbourhood, its heights and hollows and level lands, its streams and ponds—should be conveyed viva voce. At this stage, a class-book cannot take the place of an intelligent teacher. Children should go through the book twice, and should, after the second reading, be able to answer any of the questions from memory. Charlotte M. Mason

REVIEW OF SCOTT FORESMAN GRAMMAR AND WRITING PRACTICE BOOK GRADE 5 ANSWERS

- This book has been a college required reading in some schools. It tells of a man living in a concentration camp in implorable conditions. He observes how human nature drives some of the prisoners and the ways their lives are lived simply through the mind and the thoughts one gives it. You can also actually feel what he lived through and the process after the American's set the people free and the way life had changed for them. Also you can see the victory achieved by 'right thoughts'. Very powerful book. I'm glad to have it on my bookshelf next to "Night" by Elie Wiesel which was a winner of The Nobel Peace Prize. The horrors allow you to look at man's inhumanity to man and know you want to empower yourself to move toward love and forgiveness.
- The series started out slowly fell off in the 2nd but the 3rd and now the 4th one have been very good. This one beats out the previous one but not by much. It continues the Gateway series obviously but also continues the story from the Avatar books and from the Section 31 edition. The story is excellent and the characters very interesting. To me it had some nice surprises and they continue to show more of Vaughn and Shar's trouble. You also have a good tale about Quark and Kira with the JemHadar guy. Overall great book hopefully the next two are also good.
