REVIEW OF SELMA

- I love this novel for its silent horror. Everything about it conveys the main character's lot in life. The story literally closes in on you the same way that her world has closed in on her. As with "The Penelopiad," I feel like Atwood's story is needlessly relegated to feminist literature. It's so much more than that, both as a continually relevant social commentary and as a work of art. It'll never be the feel good read of your life, but the story never falls into hopelessness or preachiness, and that keeps it alive.
- I first read this book in college, and have reread it a number of times since then. The story is set in the newly-formed Republic of Gilead, what used to be the United States (and more specifically the story is set in and around Harvard Square in Cambridge, MA). Atwood incorporates a number of different and some might say disparate schools of political theory into this dytopia, including communism, Christian fundamentalism, and radical feminism, and shows what happens when normal citizens fail to educate themselves about ideas that may differ with their own. While many reader may consider this novel completely feminist or anti-Christian, a closer look reveals neither to be true. The Republic of Gilead twists Christianity considerably from its true message; in fact there is one passage where Baptists (who a lot of people think of as the "most religious" Christians) are being beseiged by the Gileadean army. And it makes a number of jabs at the goals currently held by some radical feminists, among them striving for a man-free "women's culture". All in all, this is a book that gets off to a somewhat slow start but really grows on you after awhile, and by the time you get to the end, you want to pick it up and start all over again. The scariest but also most imspiring part was thinking about what we as a society can do to prevent this.
