- Identity Crisis was book that DC Published a couple of years ago to compete the other comic book companies attempts at "realism," and like those FAILURES this one doesn't live up to it's own expectations. The plot itself isn't that bad. Somebody is moving the characters of the DC Universe, good and bad, around like Chess pieces for an unknown reason. This both sides of the Super powered community to start getting worried and making their own investigations. The characters from both sides are blinded by anger, lust, and jealousy to do their actions, and the person who was pulling the strings decides to act these emotions out also, making the mystery truly a mystery that comes out from nowhere in the story. As said earlier however, the writer tries to make the story seem realistic but the DC Universe isn't realistic, nor is any comic book really. The entire mystery begins realistic with the house that's attacked being under all kinds of investigation: mother box, animal senses, the metal men tested if it had some kind of metal alloy. But then the real question is, if this person needed to be under that amount of protection, why wasn't there a video camera inside and outside the house, especially in the places that wouldn't normally be expected because the husband of the attack was a detective. Bye bye mystery if that happened! So why didn't it? The plot said alien technology, animal sense, and metal alloys was used to scan for evidence, so why not a video camera? Oh that's right, the plot said so. The art in this book, my Rag Morales is just beautiful to look at however, and very emotional throughout the story making one feel as if they were at every scene of the book.
