REVIEW OF ELECTRICAL ENGINEERING WORKSHOP PRACTISE

- Please consider Viktor Frankl and his wonderful books with me for a few moments in time. The reason I edited in Psychology and against Psychiatry and Analysis was the same as the reasons of the great doctors of Europe had. Analysis made people capable of doing things and of pleasure instead of living, adapting, and even being able to suffer and triumph over it. This is not a tautology at all. "Pleasure" and "doing" are the parts of life that rudimentary psychologies, as still exist in alleged "depth" and analytical psychology still do to the limited extents that it still survives and continues to damage human beings. It is time to reconsider the books and thoughts of the great European born and internationally famous and revered Doctor and Existential Psychologist Viktor Frankl, who wrote "Arztliche Seelsorge," or "The Doctor and the Soul" and "Man's Search for Meaning." I was recently appalled that the life and work of Viktor Frankl contradicted every single thing a very bright and wonderful person whom I "met" on-line over two years ago, and later in person is and has been doing for

many years in addition to getting support, conditional acceptance, and acquiescence from all family and friends for their behaviors and lifestyle. I became greatly concerned when I was trusted and admitted into the home of this fine person and discovered that they had never had much of a home at any time, but indeed had a very rich work life. This person had actually ceased to exist at all at home during the previous five years. Much of Europe supports this sort of existence, and certain countries there. This life completely contradicts and inverts what FRANKL who survived the entirety of Auschwitz and other places like it from 1939-45 says it NOT the way to do things. Instead of being outraged at their "help" playing psychological detective instead of helping them to find real meaning in life versus being emotionally cold and inwardly dead. Frankl and others I worked with as a very young person in the early 1960's took a sense of compassion and concern born of their experiences much like Frankl's with the Nazi world, and of Ratibor Jurjevich with the communists after the war and Nazi invaders during it. The entirety of the second chapter of "The Doctor and the Soul" deals with the movement from psychoanalysis to existential analysis, and particularly the meaning of life and work in all of its nuances inclusive of love, suffering and our work. The meanings of life, death, and the experience of the concentration camp and healing from it form part one. Part three defines LOGOTHERAPY and its development on the bases of experience and the results of other less effective and very "attractive" forms of analysis all stemming from Freud that 'allow' other to develop a life that is devoid of spirit and human responsibilities. The needs of the human spirit do not change.

I've shared them with family including children, friends, colleagues, and readership for some time. Will to meaning is something that animals and analysts do not do or worry about at all. Frankl and others to include all of the American Psychological Association noted that psychoanalysis, analysis, and all "alleged" depth and analytical approaches to humans were more than willing to turn "will to meaning" to a neurosis and frailty! Human spirituality exists separate of religion, and very often atheists and their families neglect this aspect of life at their peril. The

concept of deity and spirituality are and should be mutually exclusive. Religion demands and does otherwise and atheism and agnosticism often throw out the proverbial baby and bathwater. Spirituality is a value and scientific in every way as Frankl is willing to relate to those willing to read. "The mind is a place of its own and makes a heav'n of hell and a hell of heav'n." John Milton: "Paradise Lost"
