## REVIEW OF THE CREAKERS

- I read this because my 15 year old granddaughter had it assigned in a high school English class. Tomorrow they start discussion groups. It is hard to imagine talking about the sexual explicitness of the work in a class. I don't know that I could talk about it one on one with her myself. My first reaction was how many artifacts and social institutions Huxley has anticipated. Resort hotels in the Arctic with television in the bedroom (yes, 1932). The hospice Linda ends her life in, not very different from the hospices of today. Test tube babies. Helicopters buzzing around like

Vietnam. (Not so frequent in the skies for civilians today). No we don't have "feelies" but the explicit sex in movies today mirrors the intent. The sexual revolution where birth control has led to loveless relationships. Institutionalization of the one night stand. The most alarming thing about the book is the acceptance, as in Plato (as another reviewer mentioned) of a class based society with jobs assigned on the basis of ability. Not that it is any different from the Hindu system of castes. Test based discrimination of the early Chinese state is not that different from the SAT state of today. It violates the "American dream" of equal opportunity. The book does not seem to hang together very well and the insertion of the Reservation scenes is not realistic. However, it does give a chance

to introduce the Savage and his role as representing a moral human being, or at least moral based on the general morality as perceived by the UN and possibly the civilized world of today, espoused, if not practiced. I am glad it assigned for the sophomore year of high school. It took me many years to arrive here. It raises questions covered in the world history class she is taking at the same time and I hope the discussions of the students in the next few weeks will remain talking points for them for many years to come.

- Aldous Huxley was the brother of Julian Huxley, a fervent eugenicist and darling of the robberbaron banker Elites. It is hard to know whether Brave New World (BNW) is cautionary, or a piece of predictive programming. It represents a

worldview where social order is based on a sort of biologic caste system- not due to breeding or genetic manipulation (this book predates the discovery of DNA), but due to postnatal treatments designed to dumb people down to the level appropriate for their preordained station in life. Naturally, the "Brave New World" has a pyramidal structure, with Elites at the top, and a much broader base of "Deltas" in the slave caste. It is perhaps one of the most frightening ideas of all time that technology could become a tool of subjugation, pushing the world into a neo-feudal prison instead of elevating us on a pathway to collective self-actualization. The totalitarianism in BNW is as thorough as that depicted in Orwell's 1984, but of a softer variety. Where Orwell employs a paramilitary

police force to enforce Big Brother's oppressive rule, Huxley's society secures obedience through drugs, slicker, more corporate-looking propaganda, social controls, and economic incentives. There is more carrot than stick, but the Brave New World is a hellish nightmare nevertheless. As technology marches forward, gaining momentum as it goes, one wonders whether some of these developments might be inevitable. But

the idea that technology will be the root of our problems is as flawed as looking to technology to solve all our problems. Social problems need to be solved (or averted, I hope) by changing attitudes. The key to preventing a Brave New World does not lie in halting the progress of science or industry; it lies in prizing the one thing missing from Huxley's nightmare state: civil liberties
