## REVIEW OF MANITOU MT 1740 SPARE PARTS MANUAL

• As the parent of a late talking child. I was concerned that he exhibited all of the symptoms quoted by the "experts" for a child with PDD-NOS. Little did I realize that taking him in for a free evaluation by the state would lead to School Psychologists and counselors demanding that I enroll him in their "enhanced" programs. After one psychologist accused me of being "in denial" I sought more information and found "The Einstein Syndrome". This book helped me understand the political and bureaucratic and academic machinations which are creating this bogus "Autism Epidemic" especially in California. This book offered my wife and I real hope at a very dark time in our lives. I've waited almost 2 years to post this review. My son is now a playful, intelligent, affectionate, TALKATIVE 4 year old getting ready for kindergarten. All of the Autism/PDD "symptoms" completely disappeared on their own. And I have the luxury of returning that diagnosis to the psychologist with a big "F" written on it. Just to show there's no hard feelings, though. I plan on giving her a present, a copy of "The Einstein Syndrome".=====

8 Years later, in honor of my sons 12th birthday, I would like to update my review. My son is currently getting straight A's and is enrolled in the school gifted program and is doing great in an accelerated math class. I'm very proud of him, he's the best son any father could hope for. The bureaucrats and educators in the school still occasionally harass him. They try to discipline him

because they feel he looks or acts odd, not for any genuine reason. I have let the principal know that that I stand behind my son. I have come to feel that there's a real problem with misguided young (feminist) educators in our schools (especially in California). They don't seem to understand boyish behavior, especially behavior of the type that is characterized as autistic, and so they are try to label these children as diseased. There's money and careers to be made by these diagnoses, so it is sometimes difficult for parents to withstand the pressure of these "experts". Without this book I wonder I would have had the courage to stand up to those educators who pushed so strongly to have my son put in a class for mentally disabled students. Instead I stood my ground and insisted he stay in the normal classes, and he has thrived. Thanks again, Einstein Syndrome.

• I agree with many other reviewer that Einstein Syndrome has limitations; in fact, the author recognized that fact. It is also similar to Late Talking Children. However, it is another lifeline for parents who may be battling a school or health care system which is not always well oiled in that it invites parents to take an active part in their child's development. I did not find that Sowell rejected evaluation and has even suggested testing for both hearing and speech, in conjunction with a pediatrician, at the appropriate time. His most important point on Einstein Syndrome is that it is up to the parents to oversee the testing, to guarantee that their child is well-treated as in individual during the process, and that the experience is positive for the child and the family. Having worked in many health care systems, I can say that there are many qualified experts out there; some parents, however, may need information and guidance to help them deal with those who are not. This book is for them.
