## **REVIEW OF INTERNATIONAL IEC STANDARD 60865 1**

- If it's written by Bradbury, its got to be good. He is one of the best science-fiction authors, and Fahrenheit 451 is no exception. It is dramatic, with broken bonds, chase scenes, and runs with the law. The ultimate ending is powerful and strong and creates a great ending for a great book.
- I read this book after having read 1984 and Brave New World. It's far less complex in terms of language and expressions than those two, which makes its reading easy and fast. But Fahrenheit's story is clearly "too much" inspired by Orwell's and Huxley's work,

with too obvious similarities hard not to be comparable at the same time you go through the book. An example, Fahrenheit's big televisions on the walls in the houses. Remember Big Brother speaking from wallscreens in 1984? On the other side, Bradbury let us know that books are synonyms of "culture", and "development of thinking", which in my opinion are arbitrary statements. There can also be non educative books as there are non educative tv programmes or popcorn movies. And the story changes its course abruptly at the end. The characters that didn't die are running madly across the forests, with an ending that is hardly convincing. My advice would be not to read this book, at least if you've already read those other two...
