REVIEW OF STEAM PLANT OPERATION 9TH EDITION

- This is my very favorite popular science book. Professor Kaku is an excellent and entertaining writer and he brought a made a very complex subject penetrable by non-physicists. I never tried to read about string theory because I figured there were no easy ways to learn about it. Then I stumbled upon this book accidentally at the library and had one of those marvelous "AHA!" moments that I haven't really had since I was in school. Thank you, Professor!
- I enjoyed all of Gail Carriger's Parasol Protectorate books. They are not predictable and she has a great sense of humor. If you like something a little different I would recommend this series.
