REVIEW OF PARALLEL AND PERPENDICULAR ALGEBRA 1 ANSWER KEY

- I'm about halfway through ERAGON, and I love it! At the beginning, there was a lot of awkward writing, but as it progressed it became smooth and well-written. Sometimes there are moments that can be truly called beautiful, like when Paolini describes a rock formation as "the bones of the earth". And he is only 19--15 when he started the book! I think he tremendously talented. It's also inspiring to me as a young writer, and encourages me to keep on trying with my own fantasy novel. A lot of reviewers have said that ERAGON is cliched and predictable. Yes, it's not terribly difficult at times to guess what's coming next. And many of the ideas have been previously used. But I think we should remember that just about every story has been told at least once. Shakespeare, in fact, cribbed the plot of ROMEO AND JULIET from another writer. But it's Shakespeare's work we remember, because of the quality of his writing. And I think it's the same with Paolini. I can't wait for the next book in his trilogy.

- This book won't keep you on the edge of your seat, it will keep you leaning back in an armchair asleep. Eragon is an idiot. He's always whining, getting knocked out, whining, getting beat up, whining, snapping at someone, whining.

Paolini, we hate whimpy cry-babies! He becomes an expert swordsman in a few months? Trust me, all that can be learned in a few months are the basic moves, and there's a lot more to swordsmanship than the moves. It's clear that Paolini didn't study the subject before he wrote about it. In one sequence while he's fighting he's "combining different moves". You can't combine different sword moves, that's like combining walking and sitting. Of course he has to fall in love with the beeeeeeautiful girl (why she likes him is beyond me.) I heard that the character Angela (why do the women have normal names?) was based on Paolini's sister. If I were her I'd sue him! Angela is the second stupidest character in the book! The battle was completely undescribed. How does Saphira suddenly wind up surrounded by Urgals (don't even get me started on them) who are sticking her with spears piercing her armor which was supposed to be sooooo strong, and she can't fight back. And during the battle all Eragon seems to do is see his friends fighting. Arya, Eragon's love interest, was so over-described that I got sick. She has long, flowing dark hair, slanted eyebrows, a scar on the cheek (strangely enough like Liv Tyler in LOTR) Eragon has dark eyes and dark hair but that's all we know about him (a bit like Paolini, hmmm might have uncovered something there). Almost all the story

lines were copied from something else. Here's something I can't figure out: Eragon's uncle gets killed, he rushes off to kill the Ringwraith-like killers. As soon as they encounter them Eragon decides not to kill them. Why?! As soon as they disappear, he starts having dreams and visions about some girl who is in prison, and of course, he, Eragon, aka Superman, must rescue her even though she has absolutely nothing to do with anything except nothing! Then he decides he must go fight the evil king Galbatorix (sounds like a brand of cereal) who rules the land by doing anything evil. Let me guess, he marries Arya and they become the reluctant, wise, benevolent rulers. Oh please! Hmm, where have I heard that before? He would probably enact laws prohibiting use of the word "said" since Paolini seems to hate it. One more thing that annoyed me was the hunting scene at the beginning. Deer don't travel in large herds and all sleep together at night. Also Eragon misses his deer by "a hair's breadth". I still can't figure out what part of the deer he was aiming for. The vital parts of a deer are pretty hard to miss by a hair's breadth without still hitting the deer. Another instance of the author failing to research before he wrote. My advice, don't bother. The story lines were much better when they were in their original stories.
