Thank you for picking our system for your PDF downloads. We look forward to giving you with outstanding solution and varied alternatives for many years ahead.

## REVIEW OF ISRO EXAM SAMPLE PAPERS

- This is a large coffee table type of book. It manages very well in giving an overview of the accomplishments in flight without going into tremendous detail. It has 256 pages, most of which consist of an excellent choice of photographs. It is presented in 6 Chapters; Beginnings, Exuberance, War, Blue Skies, Hot Wars and Cold Wars, and Maturity. There is a substantial index, a list of Picture Credits and 7 Double Page Flight Blueprints, each with a detailed, cut-away illustration with each part identified by a number along with its name or description. To give an idea of the detail given; the Boeing B-52G bomber with cruise missile, has 200 parts identified. Even the Spitfire fighter has 134 parts detailed. In all there are Flight Blueprints for; Spitfire fighter, Boeing B-17G bomber, Messerschmitt Me-262 jet fighter, Lockheed Constellation airliner, Boeing B-52G bomber with cruise missile, and Concorde supersonic airliner. There are over 300 photographs, all excellent, historical and stunning. As one would expect in a book such as this, the earlier photographs are B&W, and the more recent are in color. With so much to choose from, it is an extremely difficult to make choices, and only a small sampling could be included. Don't be disappointed if some of your favorite machines have not been included, they can't all be there. When you finish the book, you can't be but amazed how much of an impact competition, be it for peaceful flight or for wartime advantage, had in the development of flight machines; and how quickly it all happened. This book is listed here in two versions. The one I have was published by Carlton Books, on August 1, 2003. It is ISBN 1-84442-903-2, Hardcover glossy surface plus dustjacket, 256 pages, 4.29 pounds, 11.5 X 11.6 inches, and a List Price of \$45. The other one listed is published by Firefly Books, on November 2, 2004. Its ISBN is 978-1552979846, Softcover, 3.19 pounds 11.2 X 10.3 inches and a List Price of \$24.95. There is a review there that is less than enthusiastic about its quality. Maybe the quality between the two is reflected in the prices. As far as I am concerned, the copy I have is excellent in quality and gives an excellent overview of the history of flight and some excellent photographs.

- The description of the book "illustrate them with 150 inspired examples" is very misleading. The author talked about 150 riffs. You are supposed to find the actual riff tabs somewhere else. After buying this book, you may need to buy another 100 books to find the 150 riffs the author discussed about. Skip this book.
