A habit is a choice we make at some point, and then stop thinking about, but continue

doing. Often we do it every day. Put another way, a habit is a formula our brain automatically follows: When I see this cue, I will do this routine in order to get that reward. To reengineer that formula, we need to begin making conscious choices again.

REVIEW OF THE POWER OF HABIT

- From the standpoint of literature as a whole, it seems 451 is an important piece of work simply because of its eternal message of censorship. Ray Bradbury was a science fiction writer but managed to elevate this novel to the most important rungs of the literary community, something not many SF authors do. There's a reason for that vacuum- typically SF writing is dry, much like 451. It's a good novel, but I don't think it added much to realm of science fiction as it did to the literary community. Science fiction novels from the 50s and 60s have a distinct feel and flow to them and Fahrenheit 451 is no exception. Like many of the other novels

of the era, 451 was based on a short story written and was later lengthened to a novel. The basis is simple: books are illegal and must be burnt. That makes a tidy short story. But stretching a simple idea like that into a full length novel loses an ethereal something (the spirit? the essence? the soul?) from its inception. This occurs in many Poul Anderson novels, as well as John Brunner, James Blish and others from the same era. That ethereal something lost changes the feel and flow of a normally placid plot... much like in 451 where the onset of the protagonist's change of heart is sudden and undeveloped. The direction of change is clear and predictable. Perhaps 451 is the waving flag of examples of censorship, but its undeveloped underpinnings starve it of

greater breadth.

- Great book with a cautionary tale! I don't know how anyone who could

understand the books message give this book a bad review..? Anyway, all around Fahrenheit 451 is a great book!
