This unique book is the key to computer contouring, exploring in detail the practice and principles using a personal computer. Contouring allows a three dimensional view in two dimensions and is a fundamental technique to represent spatial data. All aspects of this type of representation are covered including data preparation, selecting contour intervals, interpolation and gridding, computing volumes and output and display. Formulated for both the novice and the experienced user, this book initially conducts the reader through a step by step explanation of PC software and its application to personal data, and then presents the rationale and concepts for contouring using the computer. Accompanying the book is a set of BASIC

programs, in ASCII format, on an MS-DOS 360KB floppy disk. These programs implement eighteen interpolation methods, five gradient estimation techniques, and seven types of display, and are designed to be adapted or combined to suit a wide range of possible objectives concerning either the comparative study of contouring methodology or the practical production of contour displays.

This book is a complete guide to the Regia Marina, the navy with which Italy fought the Second World War. Starting with the historical background, it

describes how the navy developed, how it was organised, the facilities that supported it, and the operations it conducted both before and after the armistice in 1943. It also details all its ships, with full technical particulars, plans and photos. Furthermore, there are chapters on special topics like camouflage; uniforms, decorations and insignia; and a 'who's who' of important naval personalities; and the reference value of the book is enhanced by a comprehensive bibliography and guide to sources. The illustration is a noteworthy feature of the book as the author's collection of naval photographs is one of the best in Italy. He is also a fine draughtsman, and his ship plans and colour illustrations are both detailed and accurate, adding a particular appeal for

modelmakers. Of all the main combatant navies of this era, the Italian is probably the most poorly represented in English publications, so this comprehensive handbook will be especially welcomed by the naval history community.

REVIEW OF HP 4580 PRINTER USER GUIDE

- This work is jam-packed with "how to advice" on purchasing pre-foreclosures as a current investment or "to flip". The author goes through an exhaustive list of steps to make the process doable. Part of the process is to do the following:- pay a finder- inspect the property- negotiate with the seller or foreclosing lender-

purchase the property for personal use or "flip it" for a profit. Specific internet sites to assist in the process of acquiring pre-foreclosures are as follows:-
www.iaf.net to research people-
www.switchboard.com-
melissadata.com for street addresses-
abstractoronline.com for title searches-
[abandoned property searches-](http://abandonedpropertysearches.com)
bop.com-
brbpub.com for public records-
factfind.com-
realestatepublicrecords.com-
publicrecordsfinder.com Investors should develop worksheets highlighting details of each property together with the analytic data and information sources to verify the seller's representations. This book is well organized and easy to understand. Basic definitions are explained and set forth in simple English.

The acquisition is well worth the price for your personal library.

- The only good thing about this book is it put me to sleep many night
