You can also follow us on social media sites to stay updated with our most recent offerings.

So what are you waiting for? Beginning exploring Macmillan Science Textbooks Grade 5 Study recaps today and find your following great read!

REVIEW OF MACMILLAN SCIENCE TEXTBOOKS GRADE 5 STUDY

- Granted, I didn't have to wait 12 years like most fans, cause I only discovered the books 2 weeks before the new one came out. And I'm glad! Cause after finishing the 4th book I was so caught up in Ayla's world that with the 5th book, it was just a continuation. The only downside to "The Shelters of Stone" is that there's so much geographical descriptions, but that's Jean Auel's signature and it's just my impatience speaking here. The book is

absolutely awesome, and I can't wait for the next one and I hope it doesn't take 12 years! Ayla is such a strong woman..

- This long-awaited book is just a long, boring review of Auel's previous books. There's no significant plot, only place descriptions (the same places over and over again), explanations about the animals, firestones and other discoveries (which we already read in detail in previous books), too-explicit sex (not that I mind sex,

but I get tired of it), and bad naming skills (if you've managed to get to the end of the book, you'll know what I mean). I'm tired of Ayla being so perfect, of her always ending up within the top-rank people, of her being the smartest person on Earth (I guess she'll eventually invent the wheel), etc. "The plains of passage" was pretty boring, but it had some thrill in it. "The shelters of stone" is boring, and I wouldn't recommend it to anyone. I'm very disappointed.
